

Taylor & Francis

College Textbooks
Animal Studies & Zoology,
Vet Nursing & Equine Studies

Welcome

At Taylor & Francis and Routledge we are here to help with your academic needs for your College. Explore our A Level texts and if there are any subject areas not included in this catalogue which you require resources for, do get in touch with us and we will see what we can provide.

We are, as always, keen to view textbook publishing as a collaborative process and look forward to working with you in the future.

Request Complimentary Inspection Copies!

Select textbooks are available for consideration for course adoption, available as e-Inspection Copies for you to request and review.

College Roadshows

We can arrange tailored roadshows for your college where we bring along a selection of titles for tutors and librarians to browse. Please contact your local T&F Representative for more details or see the following link:

<https://www.routledge.com/go/college-online-catalogue>

Inclusive Course Textbook Provision

Inclusive Coursebook Provision enables institutions to provide 1-to-1 access to their class texts, either through eBook platform integration or through simply purchasing print books for their students. For more information please go to:

<https://taylorandfrancis.turtl.co/story/textbook-provision-for-college-students/page/1>

Librarians

All titles featured are available in print and eBook format. To view our Librarians Resources pages please go to:

<https://librarianresources.taylorandfrancis.com/>

To explore our extensive Journals Collection please go to:

An Introduction to Human–Animal Relationships

A Psychological Perspective

Clive R. Hollin

An Introduction to Human-Animal Relationships is a comprehensive introduction to the field of human-animal interaction from a psychological perspective across a wide range of themes. This key text brings an important perspective to the field of human-animal studies and will be useful to students and scholars in the fields of psychology, sociology, animal welfare, anthrozoology, veterinary science, and zoology.

Animal Studies

The Key Concepts

Matthew R. Calarco

Series: *Routledge Key Guides*

Prefaced with a brief introduction to the field of animal studies, the text explores the key influential terms, topics and debates which have had a major impact on the field, and that students are most likely to encounter in their animal studies classes. The book will be a valuable guide to undergraduate and postgraduate students in geography, philosophy, sociology, anthropology, women's studies, and other related disciplines. Seasoned researchers will find the book helpful, when researching topics outside of their specialization. Outside of academia, it will be of interest to activists, as well as professional organizations.

Around the World in 80 Species

Exploring the Business of Extinction

Edited by **Jill Atkins, Barry Atkins**

Around the World in 80 Species: Exploring the Business of Extinction responds to the ongoing mass extinction crisis engulfing our planet by exploring the ways in which accounting, business and finance can be used to prevent species extinctions. From Africa to the Far East and from Europe to the Americas, the authors explore species loss and how businesses can stop mass extinctions through greater transparency, and through closer engagement with their investors and wildlife organisations. Businesses must urgently address extinction before it is too late for all species, including ourselves.

Forest Insects in Europe

Diversity, Functions and Importance

Beat Wermelinger

Forest insects play important roles ecologically and economically. They pollinate plants, decompose dead plant and animal tissue, provide food for vertebrates, regulate pest organisms, and shape entire landscapes. Some are considered pests, while others provide usable products. This book has been written for professional entomologists but also for nature lovers generally. The descriptions of the various roles insects play in forest ecosystems are intended to be easily comprehensible, but still scientific. The book is richly illustrated with 580 fascinating colour images of over 300 different insect and spider species.

In Defense of the World's Most Despised Species

Why we love some species but hate most, and why it matters

Ernest Small

In Defense of the World's Most Despised Species examines the psychological motivations that lead people to make judgments about the attractiveness of species, noting the overwhelming importance of visual cues. It describes in considerable detail the physical and behavioral traits of species that lead us to love or hate them.

Invertebrate Zoology

A Tree of Life Approach

Bernd Schierwater, Rob DeSalle

Invertebrate Zoology: A Tree of Life Approach is a comprehensive textbook adopting an explicitly phylogenetic organization. With the explosion of Next Generation Sequencing approaches, there has been a sea-change in the recognized phylogenetic relationships among and between invertebrate lineages. In addition, the merger of evolutionary and developmental biology (evo-devo) has dramatically contributed to changes in the understanding of invertebrate biology. Synthesizing these three approaches (classical morphology, sequencing data, and evo-devo studies) offers students a unique perspective of invertebrate diversity.

Making a Stand for Animals

Oscar Horta

Engaging and thought-provoking, this book examines how we see and treat animals and argues that we should extend equal rights to all species, human and non-human alike. Looking at both the use of animals for the production of food, as well as the suffering of wild animals, this book advocates for society to seriously take into account the interests of all animals and argues that we have a duty to treat animals with much greater care, consideration and respect. For all who care about the rights and welfare of animals, this book is essential reading.

Recognising and Responding to Animal Emotion in a Shared World

Vicki Hutton

This book draws on contemporary evidence-based research, observations, interviews and case scenarios to explore the growing knowledge base around non-human animals' capacity to experience emotions. Acknowledging that some animals can experience feelings directly affects the way that they are perceived and treated in many settings, and author Vicki Hutton explores the implications when humans apply – or ignore – this knowledge selectively between species and within species. She presents this information within a proposed hierarchy of perceived non-human animal emotional abilities, with examples of how these manifest at an emotional, spiritual and moral level.

Species, Science and Society

The Role of Systematic Biology

Quentin Wheeler

Series: Routledge Studies in Conservation and the Environment

This book presents an engaging and accessible examination of the role of systematic biology in species exploration and biodiversity conservation. This book will be of great interest to academics, researchers and professionals working in systematics, taxonomy and biodiversity conservation, as well as students with a basic background in biology.

2ND EDITION

The Animal Mind

An Introduction to the Philosophy of Animal Cognition

Kristin Andrews

Andrews introduces and assesses the essential topics, problems and debates as they cut across animal cognition and philosophy of mind, citing historical and empirical data and case studies throughout. This second edition includes a new chapter on animal culture, and new sections on the evolution of consciousness, tool use in animals, mental representation, belief, communication, theory of mind, animal ethics and moral psychology. An indispensable introduction to those teaching philosophy of mind, philosophy of animal minds, or animal cognition. It will also be an excellent resource for those in fields such as ethology, biology and psychology.

The Behavioural Biology of Zoo Animals

Edited by Paul Rose

This is the first book on captive animal behaviour and how this applies to welfare. The book enables all aspects of zoo husbandry and management (nutrition, enclosure design, handling and training, enrichment, population management) to be based on a sound knowledge of the species, its evolutionary and natural history. Chapters from expert authors cover a vast range of taxa, from primates and elephants to marine mammals and freshwater fish, to reptiles, birds and invertebrates. It explains how evidence from the wild can be implemented into captive care to support the wider aims of the zoo (conservation, education, research and recreation).

What Do We Owe Other Animals?

A Debate

Bob Fischer, Anja Jauernig

Series: Little Debates about Big Questions

Philosophers Bob Fischer and Anja Jauernig agree that human society often treats animals in indefensible ways and that all animals have moral worth; they disagree on whether that worth is equal to that of humans. In *What Do We Owe Other Animals?: A Debate*, Fischer and Jauernig square off over this central argument in animal ethics. Jauernig defends the view that all living beings are of equal moral worth and are owed compassion, on account of which we are also obligated to adopt a vegan diet. Fischer denies that we have an obligation to become vegans, and argues for the position that humans morally matter more than all other living creatures.

Why We Love and Exploit Animals

Bridging Insights from Academia and Advocacy

Edited by **Kristof Dhont, Gordon Hodson**

This unique book brings together research on human-animal relations, animal behaviour, and the factors underlying exploitative attitudes and behaviours towards animals. It explores topical issues such as meat consumption, intensive farming, and animal welfare science to demonstrate how humans both value and devalue animals. The book aims to show how attitudes towards animals have developed, based on our knowledge that animals are more complex in their thinking, feelings, and social networks than has been historically recognized. This is essential reading for students, scholars and professionals in the social and behavioural sciences interested in animal relations.

Biomechanics and Physical Training of the Horse

Jean-Marie Denoix

Effective horse trainers strive to improve the performance of their horses while preserving the integrity of the musculoskeletal apparatus. This volume enables trainers to optimize the different exercises their horses undergo during training and competition. Following a description of the biomechanics of the muscles underlying equine movement, the book discusses the muscles of the forelimb, hindlimb, and neck and trunk. These fundamentals have direct bearing on the later chapters, which focus on training and the core exercises for a horse. This text is illustrated throughout by the author's top-quality photographs, diagrams, and his own beautiful anatomical drawings.

Concise Textbook of Equine Clinical Practice Book 3

Respiratory and Gastrointestinal Diseases

Tim Barnett, Laura H. Javscas, Graham Munroe

This concise, practical text covers the essential information veterinary students and nurses, new graduates and practitioners need to succeed in equine medicine, focussing on respiratory and gastrointestinal diseases. Written for an international readership, the book conveys the core information in an easily digestible, precise form with extensive use of bullet-points, lists, diagrams, protocols and extensive illustration (over 200 full colour, high-quality photographs). The emphasis is on information tailored to general equine students and clinicians with just enough on advanced techniques to make the practitioner aware of what is available elsewhere.

Concise Textbook of Equine Clinical Practice Book 1

Lameness

Derek Knottenbelt, Graham Munroe, Michael Schramme

This concise, practical text covers the essential information veterinary students need to succeed in Equine practice, focussing on lameness. Written for an international readership, the book conveys the core information in an easily digestible, precise form with extensive use of bullet-points, lists, protocols and extensive illustration (over 650 full colour, high quality photographs and radiographs). Part of a five-book series that extracts key information from Munroe's Equine Surgery, Reproduction and Medicine, the book distils best practice in a logical clinical-based approach. The spiralbound format allows the book to lie open during practice.

Concise Textbook of Equine Clinical Practice Book 4

Liver, Endocrine, Urinary, Skin and Wounds

Edited by Graham Munroe, François-René Bertin, Antonio Cruz, Andy Durham, Derek Knottenbelt

This concise, practical text covers the essential information Equine veterinary students need, focusing on skin, urinary, liver and endocrine diseases. The book conveys the core information in an easily digestible, precise form with extensive use of bullet-points, tables, flow-charts, diagrams, lists, protocols and extensive illustration. Part of a five-book series that extracts and updates key information from Munroe's Equine Surgery, Reproduction and Medicine, Second Edition, the book distils best practice in a logical straightforward clinical-based approach. Ideal for veterinary students, nurses and practitioners needing a quick reference 'on the ground'.

Equine Anesthesia and Pain Management

A Color Handbook

Edited by **Michele Barletta, Jane Quandt, Rachel Reed**

Series: *Veterinary Color Handbook Series*

Equine Anesthesia and Pain Management: A Color Handbook brings together key information for clinicians in an easy-to-use, problem-orientated format. It disseminates a wealth of knowledge in a quick reference style, with a focus on clinical practice. Fifteen chapters cover everything from anesthetic equipment, premedication and physical restraint, to total intravenous anesthesia, inhalant anesthesia and partial intravenous anesthesia, recovery, complications, and euthanasia. Over 250 superb color photographs and diagrams bring the material to life. This book will be invaluable to equine practitioners, veterinary technicians/nurses, and veterinary students.

2ND EDITION

Equine Internal Medicine

Self-Assessment Color Review Second Edition

Tim S. Mair, Thomas J. Divers

Series: *Veterinary Self-Assessment Color Review Series*

Written by well-respected experts in the field, this new edition of a bestseller has been completely updated and includes all new cases. The cases appear in random order, just as they would in practice, and are presented as self-assessment problems comprising integrated questions, illustrations and detailed explanations designed to educate as well as to provide answers. The book is designed to appeal to veterinary students preparing for exams, and to veterinary practitioners in their continuing professional development.

Equine-Assisted Mental Health for Healing Trauma

Edited by **Kay Sudekum Trotter, Jennifer N. Baggerly**

This book demonstrates a range of equine-assisted mental health approaches and step-by-step strategies for facilitating recovery from trauma for children, adults, and families. Chapters address topics such as chronic childhood trauma, accident-related trauma, complex trauma and dissociation, posttraumatic growth in combat veterans, somatic experiencing and attachment, eye movement desensitization and reprocessing (EMDR), reactive attachment disorder (RAD), relational trauma, and sexual trauma. Experts also provide case studies accompanied by transcript analyses to demonstrate the process of trauma healing.

Equine-Assisted Mental Health Interventions

Harnessing Solutions to Common Problems

Edited by **Kay Sudekum Trotter, Jennifer N. Baggerly**

This edited collection teaches counselors how to design and implement equine-assisted mental health interventions for different populations and various challenges. Supported by ethical considerations and theoretical framework, chapters cover common issues including depression, anxiety, grief, ADHD, autism, eating disorders, substance abuse, self-esteem, social skills and communication, couples and family work, and professional development. Each chapter provides practical tips for implementing treatment strategies, case studies with transcript analyses, and sample session notes.

Equine-Assisted Psychotherapy and Coaching

An Evidence-Based Framework

Andreas Liefoghe

Based on over a decade of sustained longitudinal research with a broad range of different user groups, On Equine-Assisted Psychotherapy and Coaching: An Evidence-Based Framework is an essential guide which offers both theoretical foundations and practical models for working with horses in psychotherapy and coaching. Building to provide a comprehensive, evidence-based framework for equine-assisted psychotherapy and coaching, this essential book offers psychotherapists, coaches and all those who work in a helping capacity a clear insight into what horses can and cannot do in a therapeutic role.

Fine Riding

Blending Classical Riding and Equitation Science

Susan McBane

In precise, practical language, *Fine Riding* describes how to blend the principles of classical riding with the modern findings of Equitation Science. Applicable to riding of all schools of thought, from hacking to racing, including jumping, McBane applies the results of rigorous scientific studies to the historical, classical training and riding of horses in an ethical, humane and effective way. The book explains the principles of 'fine riding' in such a way that readers will feel able to put them into effect themselves, serving their horses with renewed understanding and commitment.

How Change Happens in Equine-Assisted Interventions

A Theory of Horses, Humans, and Psychotherapy

Noreen W. Esposito, Angela K. Fournier

How Change Happens in Equine-Assisted Interventions gives clinicians and researchers an intervention theory on the mechanisms of change during psychotherapy and other interventions that incorporate horses. Practitioners will come away from this book with a unique perspective on the field and with an increased understanding of what their clients are thinking both in and out of session. Researchers will have an explanatory theory from which to draw testable hypotheses when studying interventions incorporating horses.

Language Signs and Calming Signals of Horses

Recognition and Application

Rachael Draaisma

This practical book helps you interpret and connect the physical signals that horses display in response to their environment. These signals are evident in the everyday actions, gestures and attitudes that horses communicate to each other, but are often so subtle that they can go unnoticed by humans. This book aims to rectify that, offering horse lovers and equine professionals an opportunity to gain a unique insight into their 'horse's world', allowing them to calm the horse before his stress rises to an unmanageable level.

Scentwork for Horses

Rachael Draaisma

This is the first practical guide on how to implement scentwork into the lives of domesticated horses, enhancing behaviour, welfare and the human-animal bond. Draaisma demonstrates how scentwork improves the horse's learning abilities, development, socialisation and their bond with the handler, showing how to have your horse explore their environment, participate in scentwork games and follow a footstep track. Whether veterinarian, behaviourist, trainer, animal-assisted therapist, equine physiotherapist or horse owner, this book promises to bring both you and your horse enormous benefits.

Canine Infectious Diseases

Self-Assessment Color Review

Edited by **Katrin Hartmann, Jane Sykes**

Series: Veterinary Self-Assessment Color Review Series

This book covers all types of canine infectious diseases, including infections caused by viruses, bacteria, parasites and fungi. Over 200 clinical cases are presented randomly, as in practice, and cover the range of infectious diseases which affect all the organ systems of the dog. Featuring international expert contributors, the illustrated cases contain integrated questions and detailed explanatory answers.

Concise Textbook of Large Animal Handling

A Practical Handbook

C. B. Chastain

This concise, instructional guide condenses the most important aspects of large animal handling. It provides a portable, durable, beside-the-animal means of learning, as well as a convenient way to refresh on safety and efficacy in animal handling techniques. The text covers handler and animal safety, sanitation, approach and capture, routine handling and release, handling for medical procedures and use of restraint equipment. Important reading for undergraduate veterinary students on EMS rotations, as well as practicing veterinarians, technicians and assistants, the book covers species encountered in farm, equine and laboratory settings.

Concise Textbook of Small Animal Handling

A Practical Handbook

C. B. Chastain

This instructional pocket reference condenses the most important aspects of small animal handling. It provides a portable, durable means of learning 'on the ground'. Spiralbound for practical use at the animal's side during veterinary placements in a clinic or laboratory, the text covers handler safety, animal safety, sanitation, approach and capture, handling for medical procedures and use and supply sources of restraint equipment. A Companion Website provides additional self-assessment questions and answers to aid learning. Important reading for undergraduate veterinary students as well as practicing technicians, nurses and assistants.

3RD EDITION

Day's Veterinary Immunology

Principles and Practice

Brian Catchpole, Harm HogenEsch

Michael Day's Veterinary Immunology: Principles and Practice is the adopted text in numerous veterinary schools throughout the world. Updated and revised by Brian Catchpole and Harm HogenEsch with advances in knowledge since 2014, this third edition reflects the rapid developments in the field internationally, while preserving the strengths of Day's original writing. It adds numerous case studies demonstrating the clinical context across companion and farm animals. Animations hosted online add a new element of practical application.

Demystifying Dog Behaviour for the Veterinarian

Kendal Shepherd

This practical guide for busy veterinarians demystifies canine behaviour while emphasising its importance. Authored by acclaimed veterinary behaviour consultant Kendal Shepherd, the book provides practical knowledge of dog behaviour and an understanding of how to talk about it with clients. Shepherd shows how this can enhance the relationship between owner and pet and between dog and environment as well as improve the vet's own sense of fulfilment and enjoyment of practice. Packed with anecdotes drawn from real-life cases, the principles can be effortlessly assimilated into the average consultation.

Health and Welfare of Brachycephalic (Flat-faced) Companion Animals

A Complete Guide for Veterinary and Animal Professionals

Edited by **Rowena Packer, Dan O'Neill**

Health and welfare issues relating to brachycephalic (flat-faced) dogs are now one of the most pressing problems facing companion animals. This book aims to equip veterinary professionals, animal welfare scientists, dog breeders and the interested owner with the full story about brachycephalic health and welfare. Cutting-edge knowledge is provided on a range of disciplines including anaesthesia, ophthalmology, dermatology, respiratory disease, neurological, dental, reproduction and weight control. The book offers substantial practical advice for veterinary teams on welfare and ethical issues around choosing, owning and caring for brachycephalic dogs to share with clients.

How to Raise a Puppy

A Dog-centric Approach

Stephanie Rousseau, Turid Rugaas

Drawing on research into how dogs naturally rear their young, and how dogs have evolved to behave and spend their time, *How to Raise a Puppy* supports a new way of sharing our lives with our dogs. It also offers advice on dealing with some of the common challenges people experience with puppies, and tips for managing adolescence. A much-needed resource for dog trainers, veterinarians and behaviourists to recommend to clients, this conveys a powerful message to help overcome all too common issues so many people have with their puppies. Packed with practical advice, it offers an overdue "puppy perspective", with respect for a dog as a sentient being at its core.

2ND EDITION

Moriello's Small Animal Dermatology, Fundamental Cases and Concepts

Self-Assessment Color Review

Darren Berger

Series: *Veterinary Self-Assessment Color Review Series*

Karen Moriello's seminal book has been completely updated in an effort to create a true two-volume set highlighting fundamental and advanced concepts. This revised fundamental edition includes all new cases and nearly 300 new images. The guide uses a case-based format to deliver a general overview of dermatology of the dog and cat, providing a reference that mirrors the way veterinarians will encounter different scenarios at random in real-life practice. It uses self-assessment problems to review the most common skin diseases encountered every day, plus some more obscure diseases that a veterinarian will face.

Narrative Medicine in Veterinary Practice

Improving Client Communication, Patient Care, and Veterinary Well-being

Karen R. Fine

This is the first guide to Veterinary Narrative Medicine, a cutting-edge approach with multiple applications, including improved client communication, medical outcomes, and veterinary wellbeing. It explores techniques and theories from human Narrative Medicine while addressing topics unique to veterinary medicine. Communication with caretakers is vital for veterinarians as the patient cannot speak; veterinary practitioners must consider the stories of human clients as well as animal patients. Awareness of these narratives can also help practitioners set and maintain emotional and work-place boundaries, and decrease burnout and compassion fatigue.

Obesity in the Dog and Cat

Edited by **Martha G. Cline, Maryanne Murphy**

A complete, balanced diet is one of the fundamental aspects to optimizing health and longevity in companion animals, yet obesity in dogs and cats is becoming a major problem. This book provides a comprehensive review of obesity in small animal medicine with clinical application to veterinarians seeking to provide weight management services in practice. With multiple authors from both academic and practice backgrounds, the chapters cover topics ranging from epidemiology and pathophysiology of obesity to evaluation of body composition, and nutritional and behavioural management, as well as role of exercise in managing obesity. Case studies demonstrate these topics in practice.

2ND EDITION

Rabbit Medicine and Surgery

Self-Assessment Color Review, Second Edition

Edited by Emma Keeble, Anna Meredith, Jenna Richardson

Series: Veterinary Self-Assessment Color Review Series

This book covers a wide range of topics from basic biology and husbandry to advanced diagnostic, medical, and surgical techniques. This new edition offers an increased emphasis on more advanced diagnostic and imaging techniques as well as recent advances in emergency care, analgesia, and surgery. Written by practitioners with many years of experience treating rabbits, this highly illustrated and easy-to-read edition includes 230 new and updated cases in random order, as they would be presented in practice. Each case includes questions with answers that fully explore the disease or disorder in question. It is an invaluable resource for all those working with pet rabbits.

Small Animal Imaging

Self-Assessment Review

John S. Mattoon, Dana Neelis

Series: Veterinary Self-Assessment Color Review Series

Presented in an easy-to-ready format, Small Animal Imaging: Self-Assessment Color Review offers a case-based approach to reviewing and interpreting images and developing a differential diagnosis when necessary. Nearly 200 cases are presented, each beginning with the patient's age, gender, breed, and species. The reason the patient was brought to the clinic is discussed along with preliminary examination and diagnostic test findings. Supporting high-quality images are also presented with each case. A separate section presents detailed answers including information on the radiographic findings, radiographic diagnosis, comments, and notes on whether further imaging or evaluation is needed.

2ND EDITION

Small Animal Medicine and Metabolic Disorders

Self-Assessment Color Review

Edited by Craig Ruaux

Series: Veterinary Self-Assessment Color Review Series

Nearly 20 years after Bryn Tennant's first edition, this new update covers all aspects of diseases and disorders and affecting organs of the abdominal cavity and the endocrine/metabolic system in a case-based format. Responding to advances in imaging technology, digital radiography and high-resolution ultrasonography as well as the growth in specialised diagnostic tests for many diseases, editor Craig Raux brings together a wide variety of new cases. These cases cover a wide spectrum of metabolic, endocrine, immune-mediated, inflammatory and infectious diseases and range in difficulty. They are presented in random order, as they would appear in everyday practice.

The Good Cat Parent's Guide to Feline Behavior Modification

Alana Linsay Stevenson

In this book, Elite Fear-Free and Low-Stress Handling Certified author Alana Stevenson aims to empower cat parents by demonstrating how to address and modify challenging cat behaviors. You will begin by learning basic kitten care and feline developmental stages, how cats differ behaviorally from group animals such as dogs and people, feline body language and how cats handle stress. The book then provides clear guidelines for resolving feline behavioral problems such as failure to use the litter box, play aggression, petting aggression, inter-cat aggression, furniture scratching, jumping on counters, obsessing about food, night wailing, fear of people, and aggression to strangers.

2ND EDITION

Veterinary Cytology

Dog, Cat, Horse and Cow: Self-Assessment Color Review, Second Edition

Edited by Francesco Cian, Kathleen Freeman

Series: Veterinary Self-Assessment Color Review Series

This highly visual book provides a comprehensive survey of cytological features and patterns as an aid to study, revision and continuing education for veterinarians in practice and training. Illustrated in full-colour with over 240 photomicrographs, the cases are presented randomly and appear as self-assessment questions with detailed explanatory answers. Species covered include the dog, the cat, the horse, and the cow. The new edition adds 89 brand new cases and updates all the existing content to ensure its continued relevance in practice. This fully-revised second edition continues to be an invaluable reference for veterinary practitioners, veterinary students, nurses, and technicians.

Veterinary Nursing Care Plans

Theory and Practice

Helen Ballantyne

This book offers a broad overview of the theory and practice of care planning in veterinary nursing, answering three key questions: What are nursing care plans? Why should nursing care plans be used in practice? How should nursing care plans be used in practice? It provides basic definitions and explanations, the philosophical and theoretical aspects of nursing, and draws comparisons and contrasts between the veterinary and human nursing roles and contexts. There is a pressing need for veterinary nurses to establish themselves as professionals and develop their unique role within the veterinary care team. Nursing care plans are a core tool to support that development.

2ND EDITION

Academic Writing for International Students of Science

Jane Bottomley

This second edition is an accessible companion designed to help science and technology students develop the knowledge, skills and strategies needed to produce clear and coherent academic writing in their university assignments. Using authentic texts to explore the nature of scientific writing, the book covers key areas such as scientific style, effective sentence and paragraph structure, and coherence in texts and arguments. Throughout the book, a range of tasks offers the opportunity to put theory into practice. This is an invaluable tool for the busy science or technology student looking to improve their writing and reach their full academic potential.

The Psychology of Effective Studying

How to Succeed in Your Degree

Paul Penn

This book provides a vital guide for students to key study skills that are instrumental in success at university. It uses a combination of research from cognitive psychology, humour and practical examples to convey where students often go fundamentally wrong in their studying practices and provides clear and concise advice on how they can improve. The book covers time management, academic integrity, writing essays, team work, and other key required skills for academic study. Written in a humorous and irreverent tone, and including illustrations and examples from popular culture, this is the ideal alternative and accessible study skills resource for any student at undergraduate level.

2ND EDITION

The Researcher's Toolkit

The Complete Guide to Practitioner Research

David Wilkinson, Dennis Dokter

Designed for those undertaking research for the first time, the second edition of The Researcher's Toolkit is a practical and accessible guide for all those partaking in small-scale research. Jargon-free and assuming no prior knowledge, it covers the entire research process, from defining a research topic or question through to its completion. This book is a must-read guide for students and budding researchers as well as educators seeking to explain academic research and writing to their pupils. It will benefit anyone looking to complete a research project whether inside academia or beyond.

The Student Wellbeing Toolkit

Preparing for Life at College, University and Beyond

Camila Devis-Rozental

Series: *Routledge Study Skills*

The Student Wellbeing Toolkit puts wellbeing at the centre of your journey into university and beyond. By encouraging self-efficacy and a focus on the things you can control, it provides clear guidance to enhance wellbeing and opportunities for self-reflection that help develop self-awareness and prosocial skills for life. Drawing on research evidenced theories around positive psychology, theories of learning, motivation, and self-development, the book explores what, how, and why these areas are key to our wellbeing and the rationale for taking them into account to enable you to flourish and thrive at university.
