Taylor & Francis

taylorandfrancis.com

Welcome

At Taylor & Francis and Routledge we are here to help with your academic needs for your College. Explore our A Level texts and if there are any subject areas not included in this catalogue which you require resources for, do get in touch with us and we will see what we can provide.

We are, as always, keen to view textbook publishing as a collaborative process and look forward to working with you in the future.

Request Complimentary Inspection Copies!

Select textbooks are available for consideration for course adoption, available as e-Inspection Copies for you to request and review.

College Roadshows

We can arrange tailored roadshows for your college where we bring along a selection of titles for tutors and librarians to browse. Please contact your local T&F Representative for more details or see the following link:

<https://www.routledge.com/go/college-online-catalogue>

Inclusive Course Textbook Provision

Inclusive Coursebook Provision enables institutions to provide 1-to-1 access to their class texts, either through eBook platform integration or through simply purchasing print books for their students. For more information please go to:

<https://taylorandfrancis.turtl.co/story/textbook-provision-for-college-students/page/1>

Librarians

All titles featured are available in print and eBook format. To view our Librarians Resources pages please go to:

<https://librarianresources.taylorandfrancis.com/>

To explore our extensive Journals Collection please go to:

<https://www.tandf.co.uk//journals/sublist.asp>

Britain's Freshwater Fishes

Mark Everard

In these short illustrated guides, Dr Mark Everard, avid nature-watcher, angler and scientist, takes a dedicated look at three British freshwater fishes, the Silver Bream, Gudgeon and Ruffe. Though an integral part of aquatic ecosystems and well-known to anglers, these fish are often overlooked by the wider public as well as scientists. Each book is in three sections, first exploring the biology of the fish itself, including science written in accessible style, second discussing angling history and tips, and thirdly exploring the fish's cultural connections, including etymology of the fish. A bibliography at the end of each guide directs the reader to additional resources.

Conservation Concepts

Rethinking Human–Nature Relationships

Kurt Jax

Series: Routledge Studies in Conservation and the Environment

This book provides a review of the multitude of conservation concepts, both from a scientific, philosophical and social science perspective, asking how we want to shape our relationship with nature as humans, and providing guidance on which conservation approaches can help us to do this. This book will be of interest to students and scholars studying nature conservation from a variety of disciplines, including biology, ecology, anthropology, sociology, geography and philosophy.

2ND EDITION

Ecosystem Services

Key Issues

Mark Everard

Series: Key Issues in Environment and Sustainability

Ecosystem services is one of the most powerful guiding principles for ecology, biodiversity conservation and the management of natural resources. It provides the basis of assessing the multiple values and services that ecosystems can provide to humankind, including such diverse issues as carbon sequestration, flood control, crop pollination and aesthetic and cultural services. The second edition of *Ecosystem Services: Key Issues* has been fully revised and updated to address policy and scientific developments, as well as new and emerging issues, such as nature-based solutions, zoonotic diseases and environmental justice.

Gudgeon

The angler's favourite tiddler

Mark Everard

This book is a celebration of the humble gudgeon, the angler's favourite 'tiddler'. This much-loved little fish is long overdue a little book all of its own. Scientist, author and broadcaster Dr Mark Everard tells tales about the biology of the gudgeon, gudgeon fishing, and the diverse social quirks and values of this most popular of little fishes.

Leaving Space for Nature

The Critical Role of Area-Based Conservation

Nigel Dudley, Sue Stolton

Series: Routledge Studies in Conservation and the Environment

This book provides the first contemporary assessment of area-based conservation and its implications for nature and society. This book is essential reading for students, academics and practitioners interested in conservation and its impact on society.

Peatlands

Ecology, Conservation and Heritage

Ian D. Rotherham

Series: Earthscan Studies in Natural Resource Management

Peat is formed when vegetation partially decays in a waterlogged environment, and occurs extensively throughout both temperate and tropical regions. Interest in peatlands is currently high due to the degradation of global peatlands which is disrupting hydrology and contributing to biodiversity loss and greenhouse gas emissions. This book provides an introduction to peatlands for the non-specialist student reader of ecology, geography, environmental studies and history.

Plant Ecology and Conservation

Andrew Lack

This is an introduction to the world of plant ecology. It includes ideas about plant populations, nutrition and plant community ecology, and has an emphasis on the interactions of plants with animals, fungi and microorganisms. With the world's environmental problems having such a high profile, the book focuses on the human impact on the world's plant species. Conservation of the terrestrial world starts with plants as they form the basis of all ecosystems on land. We can understand how best to conserve the world's biodiversity with an understanding of the central role of plant ecology. This theme runs throughout with numerous examples of the disruption of ecosystems by human activity.

Ruffe

The spiky little freshwater ruffian

Mark Everard

This book is dedicated to the spiky little freshwater ruffian known better as the ruffe, pope, 'tommy ruffe' and other local names. A fascinating little fish, the ruffe is long overdue a book all of its own. Much loved by many anglers, ruffe can also be problematic when introduced beyond their native range. Scientist, author and broadcaster Dr Mark Everard details fascinating aspects of the biology, angling and wider contributions to society of the ruffe.

Silver Bream

Britain's most neglected freshwater fish

Mark Everard

This book is dedicated to the Silver Bream, a fish too long neglected by anglers, wildlife enthusiasts and science. In fact, this is the first book ever devoted to this freshwater fish. Scientist, author and broadcaster Dr Mark Everard introduces the biology of the silver bream, angling for this fish, and its diverse social quirks and values.

2ND EDITION

Sustainability: The Basics

Peter Jacques

Series: *The Basics*

This book offers an accessible and interdisciplinary introduction to sustainability and discusses key concepts such as the core principles of sustainability, the key ethical considerations for questions of sustainability, how we measure sustainability, the critical obstacles to achieving global sustainability and what happens when societies fail to observe principles of sustainability. With new coverage including the Sustainable Development Goals, a global range of case studies, the second edition also proposes a new, "sustainable humanism" that animates much of our work to make a better, more humane world.

The Complex Lives of British Freshwater Fishes

Mark Everard

This stunningly illustrated book explores the fascinating life histories of Britain's freshwater fishes, a group of animals which, despite their importance and ubiquity in our diverse waters, has before now been rarely regarded and respected as 'wildlife'. It shows how freshwater fish provide food, ornamentation, sport and cultural identity, and highlights their huge importance for conservation. Featuring over 100 full-colour photographs by renowned photographer Jack Perks, this will appeal to conservationists, marine biology students, the conservation-minded public, the angling community, and our nation of wildlife enthusiasts.

The Ecology of Everyday Things

Mark Everard

For many people, ecosystems may be a remote concept, yet we eat, drink, breathe and interface with them in every moment of our lives. In this engaging textbook, ecosystems scientist Dr Mark Everard considers a diversity of 'everyday things', including fascinating facts about their ecological origins: from the tea we drink, to things we wear, read and enjoy, to the ecology of communities and space flight, and the important roles played by germs and 'unappealing creatures' such as slugs and wasps. Ideal for use in undergraduate and school level teaching, it will also interest, educate, engage and enthuse a wide range of less technical audiences.

The Ecology of Hedgerows and Field Margins

Edited by **John W. Dover**

Hedges and field margins are important wildlife habitats and deliver a range of ecosystem services, and their value is increasingly recognized by ecologists. This book reviews and assesses the current state of research on hedgerows and associated field margins. The Ecology of Hedgerows and Field Margins will be of great interest to advanced students, researchers and professionals in ecology, agriculture, wildlife conservation, natural history, landscape, environmental and land management.

The Psychology of Climate Change

Geoffrey Beattie, Laura McGuire

Series: *The Psychology of Everything*

This book offers a psychological perspective on the current thinking on climate change, an issue of major global importance. The authors seek to demonstrate that there's a significant psychological issue connected with climate change in relation to the development of the climate change debate, optimism bias, the failure of climate change initiatives, and our attitudes towards the environment. There is also discussion of how behaviour in relation to climate change can be changed, to go some way to resolve the mistakes that have been made in the past in relation to our environment. This is fascinating reading for students, general readers and policy makers interested in climate change.

2ND EDITION

Urban Ecology

An Introduction

Philip James, Ian Douglas

This fully revised second edition reflects the great expansion in urban ecology research, action and teaching since 2015. Urban ecology provides an understanding of urban ecosystems and uses nature-based techniques to enhance habitats and alleviate poor environmental conditions. This text provides the student and the practitioner with a critical scientific overview of urban ecology that will be a key source of data and ideas for studies and for sound urban management.

Valuing Nature

The Roots of Transformation

Robert Fish, Holly McKelvey

This graphic novel-style textbook takes the reader on an exploration of the issues that arise from the growing interest in the valuation of nature. A 'motley' group of undergraduates are trying to complete a university assignment on 'nature in the modern world', leading to exploration of the diverse meanings assigned to nature, the different ways to characterise the relationship between people and nature, the many values systems held for the natural world and the approaches society can deploy to manage it. This highly interdisciplinary book invites consideration of a range of philosophical and applied debates and questions, ideal for use in the classroom.

Why Biodiversity Matters

Nigel Dudley

Series: *Changing Planet*

All life on Earth has the right to exist, but as we teeter on the verge of a sixth extinction this book discusses why biodiversity matters and why we should care if species go extinct. This book is essential reading for all those concerned with sustaining our planet, and all who inhabit it, in the face of climate breakdown, biodiversity loss and ecological collapse.

A Colour Atlas of Weed Seedlings

John B Williams, John R Morrison

Early recognition and control of weeds invariably leads to considerable savings in the cost of herbicides used on crops and in gardens. This atlas is an indispensable full color photographic guide to the 40 most common weeds afflicting arable farmland and gardens. The weeds have all been photographed at cotyledon and seedling stage to permit early identification and control. Accompanying line drawings highlight major features and calendar germination and flowering times.

Hydroponics for the Home Grower

Howard M. Resh

Hydroponics offers many advantages to traditional soil-based horticulture. These include greater control over many of the limiting factors such as light, temperature, and pests, as well as the ability to grow plants in all seasons. With instruction from one of the top recognized authorities worldwide, this book gives you step-by-step guidance on how to grow tomatoes, peppers, cucumbers, eggplants, lettuce, arugula, bok choy, and various herbs year-round within your home or in a backyard greenhouse. The book includes an appendix with sources of seeds and other supplies, along with helpful websites and other material on home-growing and caring for your crops.

2ND EDITION

Pests of Ornamental Trees, Shrubs and Flowers

A Colour Handbook, Second Edition

David V Alford

This second edition of a bestseller contains over 60 new pests and almost 90 new color photographs. It reviews the features of insects, mites, and other major pest groups, discusses the principles of pest control of ornamental plants, and includes sections on the various pests. Each major order and family is considered in turn, with details of their status, host range, world distribution, diagnostic features, and biology. The book also describes the characteristic damage caused.

Principles of Horticulture: Level 2

Charles Adams, Mike Early, Jane Brook, Katherine Bamford

This colourful guide will introduce you to the fundamentals of horticulture, whether you are taking a Level 2 RHS, City and Guilds or BTEC course, are a keen amateur or seasoned gardener. Written in a clear and accessible style, this book covers the principles that underpin growing plants for the garden and allotment; with reference to how these are tackled by professionals. With highlighted definitions, key points, and illustrated in full colour, this book will be a useful companion as you progress in the study and practice of horticulture.

Principles of Horticulture: Level 3

Charles Adams, Mike Early, Jane Brook, Katherine Bamford

This colourful guide will explain the fundamentals of growing plants, whether you are taking a Level 3 RHS, City and Guilds or Edexcel course, are a grower or gardener in the industry, or are just a keen amateur. Written in a clear and accessible style, this book covers the principles that underpin plant production and the use of growing media and crop protection, but with reference also to the same practices in the garden or allotment. With highlighted definitions, key points, and illustrated in full colour, this book will be a useful companion as you progress in the study and practice of horticulture.

Tapestry Lawns

Freed from Grass and Full of Flowers

Lionel Smith

Tapestry Lawns: Freed from Grass and Full of Flowers traces the changes in the lawn format from its origins to the modern day and offers information on how and why the tapestry lawn construct is now achievable. It provides guidance on how to create and maintain a tapestry lawn of your own and champions the potential benefits for wildlife that can follow. If you have ever thought about mowing your lawn much less, making it much more colourful and wildlife friendly, then this book will inform and guide you to create a perfect, grass-free lawn.

The Psychology of Gardening

Harriet Gross

Series: *The Psychology of Everything*

The Psychology of Gardening is the first book of its kind to explore gardening from a psychological perspective. Research shows that positive effects of gardening arise from both active physical participation and experiencing nearby nature. The book highlights how both these elements contribute to our understanding of the benefits of gardening. Each chapter reviews a different aspect of gardening experience, demonstrating how individual, evolutionary and social psychological theories offer new insights into a very familiar activity. The book will be of great interest to students in environmental psychology as well as members of the horticultural society and those interested in gardening.

The Bench Grafter's Handbook

Principles & Practice

Brian E. Humphrey

Containing 500 full color photographs and illustrations, The Bench Grafter's Handbook: Principles and Practice presents exhaustive information on all aspects of bench grafting. It details requirements of more than 200 temperate woody plant genera, covering over 2,000 species and cultivars including important ornamental, temperate fruit, and nut crops. The book explains the principles and practices of bench grafting, new procedures to enhance grafting success, and recommendations for further scientific investigation.

The Profession and Practice of Horticultural Therapy

Rebecca L. Haller, Karen L. Kennedy, Christine L. Capra

Horticultural therapy is a profession that serves the needs of practitioners having a broad understanding of the theories, techniques, and strategies for effective program development and management. This book is a manual of theories of horticultural therapy containing models of practices and programs. It features insight into methods of practice and provides a basis for education of new and experienced practitioners. Created for students of the profession, four sections define horticultural therapy practice; present theories supporting practice; explore program models and therapeutic tools for effective practice; and describe program management.

Construction Detailing for Landscape and Garden Design

Surfaces, steps and margins

Paul Hensley

Garden and landscape designs need to contain accurate and clear detailing to ensure the highest quality constructions. This book contains the elements most often used when detailing surfaces, with key information on standards, guidance and construction that the practitioner must be aware of. Alongside the text are 2D and 3D images with suggestions of measurements, design considerations and materials.

Construction Detailing for Landscape and Garden Design

Urban Water Features

Paul Hensley

With over 130 black and white CAD designs, Hensley provides guidance on a range of different water features such as drainage, water bowls and containers, walls and edges, simple structures, and rills, channels and cascades. This book offers technical references and a general knowledge of the basic principles, materials and techniques needed when engineering with water. This practical guide would be beneficial for garden designers and landscape architects seeking accessible and reliable materials for designing water features.

Field Sketching for Environmental Designers

Chip Sullivan

This graphic sketchbook is a primer for sparking imagination and creativity in landscape architecture and urban design drawing. Loaded with examples of work from a plethora of experienced artists, designers, planners and naturalists world-wide, each chapter provides easy-to-follow instructions on a wide variety of techniques for field sketching and plein-air painting. The exercises are designed to help readers progressively build a set of skills that will help them construct meaning and gain knowledge from on-site, field observation.

Innovations in Landscape Architecture

Edited by **Jonathon Anderson, Daniel Ortega**

This inspiring and thought-provoking book explores how recent innovations in landscape architecture have uniquely positioned the practice to address complex issues and technologies that affect our built environment. The editors bring together leading contributors who are experts in new and pioneering approaches and technologies within the fields of academic and professional landscape architecture. The chapters explore digital technology, design processes and theoretical queries that shape the contemporary practice of landscape architecture. Topics covered include: 3D modeling, fabrication and prototyping, augmented reality, visualization of data and design/build.

3RD EDITION

Landscape Architect's Pocket Book

Siobhan Vernon, Susan Irwine, Joanna Patton, Neil Chapman

Series: Routledge Pocket Books

This third edition of the bestselling Landscape Architect's Pocket Book, written by leading practitioners, incorporates updates and revisions to environmental and building regulations, contracts, and a range of design guidelines including materials, SUDs, environmental impact, and landscape character assessment. Providing concise, easy to read reference material, useful calculations, and instant access to a wide range of topics, it is an essential resource for landscape architects, construction industry professionals, and students.

Parametric Design for Landscape Architects

Computational Techniques and Workflows

Andrew Madl

This primer provides a sequence of tutorial-based workflows for the creation and utilization of algorithmic tools calibrated towards the field of landscape architecture. Contemporary practice and projective theory in landscape architecture requires the processing and design of data associated with complex systems to adequately represent composite, emergent scenarios. The book provides professionals and students with multifaceted skill-sets that, when applied in practice, expand and expedite conventional and speculative design workflows applicable to spatial design, and more specifically landscape architecture.

Representing Landscapes

One Hundred Years of Visual Communication

Edited by **Nadia Amoroso, Martin Holland**

Series: *Representing Landscapes*

This volume provides an in-depth historical overview of graphic and visual communication styles, techniques and outputs from key landscape architects over the past century. *Representing Landscapes: One Hundred Years of Visual Communication* offers a detailed account of how past and present landscape architects and practitioners have harnessed the power of visualization to frame and situate their designs within the larger cultural, social, ecological and political milieu. Richly detailed with over 220 illustrations, this work is a 'must-have' for those studying contemporary landscape design or those fascinated by the profession's history.

3RD EDITION

The Planting Design Handbook

Nick Robinson

The *Planting Design Handbook* is distinctive for its elegant integration of an ecological approach with an understanding of visual and spatial composition. It emphasizes the role of vegetation layers and designed plant communities in complex and diverse plant assemblages for all kinds of sites and uses. This expanded and comprehensively updated third edition still provides a complete examination of principles and practice of design for public, institutional and private landscapes. It takes account of developments in theory and practice, especially in the use of perennials, and reflects a variety of media and approaches current in landscape architecture and design.

2ND EDITION

Academic Writing for International Students of Science

Jane Bottomley

This second edition is an accessible companion designed to help science and technology students develop the knowledge, skills and strategies needed to produce clear and coherent academic writing in their university assignments. Using authentic texts to explore the nature of scientific writing, the book covers key areas such as scientific style, effective sentence and paragraph structure, and coherence in texts and arguments. Throughout the book, a range of tasks offers the opportunity to put theory into practice. This is an invaluable tool for the busy science or technology student looking to improve their writing and reach their full academic potential.

3RD EDITION

Study Skills for Foundation Degrees

Dorothy Bedford, Elizabeth Wilson

Study Skills for Foundation Degrees offers a step-by-step guide to the skills needed to successfully complete a Foundation Degree. Filled with activities and useful tips, it will help students to move from nervous novice to confident expert and provide them with the necessary tools to accomplish this. This third edition has been fully updated and features new chapters on e-learning, dissertations as well as expanded sections on ethics, feedback and referencing. Each chapter includes practical guidance as well as student perspectives that will help students through their course of study.

The Psychology of Effective Studying

How to Succeed in Your Degree

Paul Penn

This book provides a vital guide for students to key study skills that are instrumental in success at university. It uses a combination of research from cognitive psychology, humour and practical examples to convey where students often go fundamentally wrong in their studying practices and provides clear and concise advice on how they can improve. The book covers time management, academic integrity, writing essays, team work, and other key required skills for academic study. Written in a humorous and irreverent tone, and including illustrations and examples from popular culture, this is the ideal alternative and accessible study skills resource for any student at undergraduate level.

2ND EDITION

The Researcher's Toolkit

The Complete Guide to Practitioner Research

David Wilkinson, Dennis Dokter

Designed for those undertaking research for the first time, the second edition of The Researcher's Toolkit is a practical and accessible guide for all those partaking in small-scale research. Jargon-free and assuming no prior knowledge, it covers the entire research process, from defining a research topic or question through to its completion. This book is a must-read guide for students and budding researchers as well as educators seeking to explain academic research and writing to their pupils. It will benefit anyone looking to complete a research project whether inside academia or beyond.

The Student Wellbeing Toolkit

Preparing for Life at College, University and Beyond

Camila Devis-Rozental

Series: *Routledge Study Skills*

The Student Wellbeing Toolkit puts wellbeing at the centre of your journey into university and beyond. By encouraging self-efficacy and a focus on the things you can control, it provides clear guidance to enhance wellbeing and opportunities for self-reflection that help develop self-awareness and prosocial skills for life. Drawing on research evidenced theories around positive psychology, theories of learning, motivation, and self-development, the book explores what, how, and why these areas are key to our wellbeing and the rationale for taking them into account to enable you to flourish and thrive at university.
