## The Rise and Fall of the Rehabilitative Ideal, 1895-1970

**Victor Bailey**

Drawing on a plethora of source material, such as measures of public opinion, prisoner memoirs, publications of penal reform groups and prison officers, and the research of the first cadre of criminologists, this book comprehensively examines a number of aspects of the British penal system, including judicial sentencing, law-making, and the administration of legal penalties. In doing so, Victor Bailey expertly weaves a complex and nuanced picture of punishment in twentieth-century England and Wales, that goes beyond the treatment of offenders after sentence and will force historians to revise their interpretation of twentieth-century social and penal policy.

*Series: Themes In British Social History*

Ranging from the middle of the eighteenth through to the end of the nineteenth century, *Crime and Society in England 1750-1900* explores the developments in policing, the courts, and the penal system as England became increasingly industrialised and urbanised. Through a consideration of the difficulty of defining crime, the book presents criminal behaviour as being intrinsically tied to historical context and uses this theory as the basis for its examination of crime within English society during this period.

## Invisible Voices

The Black Presence in Crime and Punishment in the UK, 1750–1900

**Martin Glynn**

*Invisible Voices* explores the intersection of criminology and history as a way of contextualizing the historical black presence in crime and punishment in the UK. Through case studies, court transcripts, and biographical accounts it reimagines the understanding/s of the role of history in shaping contemporary perceptions. The book moves beyond the confines of presenting 'criminological history' as monocultural; demonstrates how 'mainstream criminology' is complicit in obscuring 'hidden criminological histories'; critically assesses the implications regarding the positioning of 'the black presence' within the discipline of criminology.

## Criminology

Explaining Crime and Its Context

**Stephen E. Brown, Stephen E. Brown, Finn-Aage Esbensen, Gilbert Geis**

How do societies define crime, and how should it be punished or prevented? Which is a more criminal act, causing a death by dumping toxic material or by shooting a victim with a gun? Are criminals born or made? *Criminology* offers a broad perspective on criminological theory. It provides students of criminology and sociology with a thorough exposure to a range of theories about crime, contrasting their logic and assumptions, but also highlighting efforts to integrate and blend these frameworks. Brown and Esbensen improve on this engaging and challenging introduction to the theory of crime and punishment, which is already perhaps the best criminology text available for undergraduates today.

## Restorative and Responsive Human Services

Edited by **Gale Burford, John Braithwaite, Valerie Braithwaite**

In Restorative and Responsive Human Services, Burford, Braithwaite, and Braithwaite bring together material showing that other fields can learn rich lessons from human services about the importance of being relational, healing, and empowering—in other words, through restorative practices. Restorative justice must be strategically integrated with a range of other strategies enabling restorative justice and learning as options of first choice. This requires integration of restorative justice with responsive regulation, a practice that this book shows how to do for challenges that range from sexual misconduct in universities to righting the wrongs of Jim Crow laws.

2ND EDITION

## Restorative Justice

Ideas, Values, Debates

**Gerry Johnstone**

First published in 2002, *Restorative Justice: Ideas, Values, Debates* is renowned worldwide as an accessible, balanced and invaluable analysis of the argument that restorative justice can provide an attractive alternative to traditional responses to crime. The second edition includes a new chapter identifying and analysing fundamental shifts and developments in restorative justice thinking over the last decade. It suggests that the campaign for restorative justice has not only grown rapidly in the last decade, but has also changed in its focus and character. What started as a campaign to revolutionise criminal justice has evolved into a social movement that aspires to implant restorative values into the fabric of everyday life. This new edition explores the implications of this development for restorative justice's claim to provide a feasible and desirable alternative to mainstream thinking on matters of crime and justice.

## Invisible Voices

The Black Presence in Crime and Punishment in the UK, 1750–1900

**Martin Glynn**

*Invisible Voices* explores the intersection of criminology and history as a way of contextualizing the historical black presence in crime and punishment in the UK. Through case studies, court transcripts, and biographical accounts it reimagines the understanding/s of the role of history in shaping contemporary perceptions. The book moves beyond the confines of presenting 'criminological history' as monocultural; demonstrates how 'mainstream criminology' is complicit in obscuring 'hidden criminological histories'; critically assesses the implications regarding the positioning of 'the black presence' within the discipline of criminology.

## Building a Black Criminology, Volume 24

Race, Theory, and Crime

*Edited by James D. Unnever, Shaun L. Gabbidon, Cecilia Chouhy*

*Series: Advances in Criminological Theory*

In light of the Black Lives movement and protests in many cities, the role of race in crime and justice is now ever-more salient. Within theoretical criminology, however, race has oddly remained on the periphery. It is often introduced as a control variable in tests of theories and is rarely incorporated as a central construct in mainstream paradigms. This volume seeks to explore theoretical issues in a depth and breadth that is not common under one cover. Again, given the salience of race and crime, this volume should be of interest to a wide range of criminologists and have the potential to be used in graduate seminars and upper-level undergraduate courses.

## Clinard and Quinney's Criminal Behavior Systems

A Revised Edition

**A. Javier Treviño**

An important classic, familiar to virtually all criminologists, Clinard and Quinney's *Criminal Behavior Systems: A Revised Edition* begins with a discussion of the construction of types of crime and then formulates and utilizes a useful typology of criminal behavior systems. The author examines the criminal career of the offender in each category, public and legal attitudes toward these individuals, support systems they may have, attitudes of the offenders, and other features. The discussion of each category of crime is thorough and enlightening, and takes the reader far in understanding the huge problem of crime and establishing intelligent definitions to study it.

## Criminological Theory

Assessing Philosophical Assumptions

**Anthony Walsh**

Criminologists can benefit from questioning the underlying assumptions upon which they rest their work. Philosophy has the ability to clarify our thoughts and even dissolve some dichotomies we thought were cast in stone. One of those dichotomies is free will vs. determinism. Criminology must reckon with both free will and agency, as posited by some theories, and determinism. *Criminological Theory: Assessing Philosophical Assumptions* examines philosophical concepts such as these in the context of important criminological theories or issues that are foundational but not generally considered in the literature on this topic.

## The Theoretical Foundations of Criminology

Place, Time and Context

Edited by **Jayne Mooney**

This book brings criminological theory to life by presenting the core theories of criminology as historical and cultural products and theorists as producers of culture located in particular places, writing in specific historical periods and situated in precise intellectual networks and philosophical controversies. It provides an invaluable contribution to the growing conversation over criminology's 'origin story' and the level that this is grounded in the idiosyncrasies of the North Atlantic world and its historical development. This book will be invaluable reading to students and academics engaged in studies of criminology and criminal justice.

## Victims

Trauma, testimony and justice

**Ross McGarry, Sandra Walklate**

Each chapter includes case studies and questions to encourage critical thinking, which makes this book perfect reading for students taking courses on victimology, victims and society, victims' rights and criminal justice
