Medicine & Veterinary Medicine Catalogue

July - December 2024
New and Forthcoming Titles

Welcome

Welcome to the July to December 2024 Medicine & Veterinary Medicine Catalogue.

We welcome your feedback on our publishing programme, so please do not hesitate to get in touch – whether you want to read, write, review, adapt or buy, we want to hear from you, so please visit our website below or please contact your local sales representative for more information.

www.routledge.com

*Prices are correct at time of going to press and may be subject to change without notice.
Some titles within this catalogue may not be available in your region.*

eBooks

We have over 50,000 eBooks available across the Humanities, Social Sciences, Behavioural Sciences, Built Environment, STM and Law, from leading Imprints, including Routledge, Focal Press and Psychology Press. These eBooks are available for both individual and institutional purchase.

INDIVIDUALS

Our eBooks are available from Amazon, Apple iBookstore, Google eBooks, Ebooks.com, Kobo, Barnes & Noble, Waterstones, Mobipocket, VitalSource, and CourseSmart.

LIBRARIES AND INSTITUTIONS

Subscribe to or purchase a wide range of eBook packages or pick and mix your own from our complete collection (a minimum number of titles applies). FREE TRIALS are available. For more information, please visit www.tandfebooks.com or contact your local sales team.

eUpdates

Register your email at www.tandf.co.uk/eupdates to receive information on books, journals and other news within your area of interest.

Partnership Opportunities at Routledge

At Routledge we always look for innovative ways to support and collaborate with our readers and the organizations they represent.

If you or your organization would like to discuss partnership opportunities, from reciprocal marketing activities to commercial enterprises, please do get in touch on partnerships@routledge.com.

Considering Books for Course Use?

This symbol shows books that are available as complimentary exam copies for lecturers or faculty considering them for course adoption. To obtain your copy visit the URL listed beneath the title in the catalog and select your choice of print or electronic copy.

Visit www.routledge.com or in the US you can call 1-800-634-7064.

This symbol shows books that are available as electronic inspection copies only.

3D Printing and Microfluidics in Dermatology

Innovations in Drug Delivery

Edited by **Madhulika Pradhan, Krishna Yadav**

3D Printing and Microfluidics in Dermatology provides thorough exploration and applications of 3D printing and microfluidics within the field of dermatology. It investigates various methods utilized in these fields, such as 3D bio-printing, nano-transporters, microscopic fabrication, and device development. The book not only examines practical applications but also delves into the design principles crucial for implementing these techniques using specific materials tailored to their intended purposes. This book targets graduate students and researchers in fields such as 3D printing, dermatology, drug delivery, bioengineering, and pharmaceutical sciences.

Advanced Soft Electronics in Biomedical Engineering

Materials, Manufactures, and Applications

Edited by **Mengxiao Chen**

The book presents the latest advances in soft electronics in biomedical engineering and its potential applications in various biomedical fields. The contributors provide comprehensive coverage of how soft electronics are used in diagnostics and monitoring, medical therapy, neural engineering, and wearable and implantable systems. In particular, some emerging research areas such as advanced soft robotics, fiber sensing technologies, and power optimization strategies are explored. The book will benefit researchers, engineers, and advanced students in biomedical engineering, electrical and computer engineering, and materials science.

Algal Biotechnology

Applications for Industrial Development and Human Welfare

Edited by **Nivedita Sahu** CSIR-Indian Institute of Chemical Technology, Telangana, India, **S. Sridhar** CSIR-Indian Institute of Chemical Technology, Telangana, India

This book deals with an interdisciplinary approach towards present-day practical challenges and recent developments in algal biotechnology and covers broad spectrum of issues ranging from diverse algae and its applications in agriculture, human food, animal feed, wastewater treatment, industry, to algal metabolites. Major themes covered in this volume includes algae-based processes for the treatment of industrial effluents, algal biorefinery and industrial trends, and applications of algae in food, feed, nutraceuticals, and pharmaceuticals. This volume aims at graduate students and researchers in biotechnology, bioenergy, renewable energy, energy, fuel and petrochemicals, & wastewater.

Algal Biotechnology

Current Trends, Challenges and Future Prospects for a Sustainable Environment

Edited by **Nivedita Sahu** CSIR-Indian Institute of Chemical Technology, Telangana, India, **S. Sridhar** CSIR-Indian Institute of Chemical Technology, Telangana, India

This book initiates with a general introduction to microalgae and algal biotechnology with subsequent discussions on all the significant aspects of applied biotechnology, bio-remediation, nano applications, multidimensional usages of algae as a biofertilizer, and a source of bioactive compounds and phytochemicals. Major themes of the book include algae and the environment, bio-remediation using algae, algal-omics and applications and large scale bioprocesses for algal cultivation, its constraints and challenges. This volume is aimed at graduate students and researchers in biotechnology, bioenergy, renewable energy, energy, fuel and petrochemicals, and wastewater.

Algal Biotechnology

Two Volume Set

Edited by **Nivedita Sahu** CSIR-Indian Institute of Chemical Technology, Telangana, India, **S. Sridhar** CSIR-Indian Institute of Chemical Technology, Telangana, India

This two-volume set gives out interdisciplinary expression at present-day practical challenges and recent developments in algal biotechnology with a focus on algal issues and its pertinent applications. It covers algae and the environment, algal-omics, bioremediation using algae, algal biorefinery and industrial trends, algae-based technology to treat industrial effluents and large-scale cultivation for algal bioprocesses. It explains algal biomass as a potential source of biofuel, biofertilizer, bioactive compounds and phytochemicals. This book is aimed at graduate students and researchers in biotechnology, bioenergy, renewable energy, energy, fuel and petrochemicals, wastewater.

Artificial Intelligence Technology in Healthcare

Security and Privacy Issues

Edited by **Neha Sharma** Chitkara University, India, **Durgesh Srivastava** Chitkara University, India, **Deepak Sinwar** Manipal University Jaipur, India

Series: *Advances in Smart Healthcare Technologies*

This book focusses on current issues with the patient's privacy and data security including data breaches in healthcare organizations, unauthorized access to patient's information, and medical identity theft. It explains recent breakthroughs and problems in deep learning security and privacy issues, emphasizing current state-of-the-art methods, methodologies, implementation, attacks, and countermeasures. It examines the issues related to develop AI-based security mechanisms which can gather or share data across healthcare applications securely and privately. This book is aimed at researchers and graduate students in bioengineering, artificial intelligence, and computer engineering.

Bionanomaterials for Industrial Applications

Edited by **Shakeel Ahmed**

This book is a comprehensive guide to the current state of bionanomaterials research and their prospective applications in a variety of industrial sectors. The book discusses the properties of bionanomaterials, types and their potential applications in various disciplines, such as biomedicine, food industry, environment, etc. It provides a comprehensive overview of the current state of bionanomaterials research and their potential applications, making it an indispensable resource for anyone interested in learning more about this dynamic and rapidly developing field. It is designed for researchers, scientists, engineers, and graduate students working in the field of bionanomaterials.

Emerging Materials and Technologies for Bone Repair and Regeneration

Edited by **Ashok Kumar** IIT Kanpur, India, **Sneha Singh** Birla Institute of Technology, Mesra, **Prerna Singh** IIT Kanpur, India

Series: *Emerging Materials and Technologies*

This book emphasizes on advancement in the field of bone repair and regeneration. It introduces bone development, repair and regeneration emphasizing the correlation of the processes including details about different biomaterials and technologies involved in the fabrication, characterization of bone related scaffolds and implants. The realm of nanotechnological intervention and folklore phytochemicals and their prospects in regenerating bone is explored including major bone related disease conditions, infection, and their tackling via tissue engineering strategies. This book is aimed at graduate students and researchers in biomedical and tissue engineering, and biomaterial sciences.

Engineering of Human Tissues and Implants

An Evolutionary Approach to Implant Design

Frederick H. Silver Dept. of Pathology, Robert Wood Johnson Medical School, Rutgers the State University of New Jersey

This book presents information on biological control systems, mechanotransduction, tissue structure, and function, and properties that can be integrated together to provide improved implant and device designs. This information is needed to develop new diagnostic tests and instruments that provide early diagnostic tests and treatments for diseases. It also introduces mechanotransduction as it relates to implant design with an overview of materials and their use in applications to treat wounds, burns, facial, hernial, ophthalmic, oral, cardiovascular, and tendon/ligaments.

Evolution of Machine Learning and Internet of Things Applications in Biomedical Engineering

Edited by **Arun Kumar Rana** Galgotias College of Engineering and Technology, India, **Vishnu Sharma** ITS Engineering College, India, **Sanjeev Kumar Rana** Maharishi Markandeshwar (Deemed to be University), India, **Vijay Shanker Chaudhary** Galgotias College of Engineering and Technology, India

Series: *Emerging Trends in Biomedical Technologies and Health Informatics*

This book provides a platform for presenting machine learning-enabled healthcare techniques and offers a mathematical and conceptual background of the latest technology. It describes machine learning techniques along with the emerging platform of the Internet of Medical Things used by practitioners and researchers around the world. The book will be beneficial for new researchers and practitioners working in the biomedical and healthcare fields. It will also be suitable for a wide range of readers who may not be scientists but who are also interested in the practices of medical image retrieval, and brain image segmentation.

Federated Deep Learning for Healthcare

A Practical Guide with Challenges and Opportunities

Edited by **Amandeep Kaur** Chitkara University Institute of Engineering and Technology, Chitkara University, Punjab, India, **Chetna Kaushal** Chitkara University Institute of Engineering and Technology, Chitkara University, Punjab, India, **Md. Mehedi Hassan** Khulna University, Bangladesh, **Si Thu Aung** University at Buffalo, Buffalo, USA

Series: *Advances in Smart Healthcare Technologies*

This book provides a practical guide to federated deep learning for healthcare including fundamental concepts, framework, and the applications comprising of domain adaptation, model distillation, and transfer learning. It covers concerns in model fairness, data bias, regulatory compliance, and ethical dilemmas. It investigates several privacy-preserving methods like homomorphic encryption, secure multi-party computation, and differential privacy. It will enable readers to build and implement federated learning systems that safeguard private medical information. It is aimed at graduate students and researchers in federated learning, data science, AI/machine learning, and healthcare.

Handbook of Texture Analysis

Generalized Texture for AI-Based Industrial Applications

Edited by **Ayman El-Baz** University of Louisville, Kentucky, USA, **Mohammad Ghazal**, **Jasjit S. Suri** Global Biomedical Technologies, Inc., CA, USA

This book examines four major application domains related to texture analysis and their relationship to AI-based industrial applications: texture classification, texture segmentation, shape from texture, and texture synthesis. Aimed at researchers, academics, and advanced students in biomedical engineering, image analysis, cognitive science, and computer science and engineering, this is an essential reference for those looking to advance their understanding in this applied and emergent field.

Handbook of Texture Analysis

AI-Based Medical Imaging Applications

Edited by **Ayman El-Baz** University of Louisville, Kentucky, USA, **Mohammed Ghazal**, **Jasjit S. Suri** Global Biomedical Technologies, Inc., CA, USA

This volume presents important branches of texture analysis methods which find a proper application in AI-based medical image analysis. Aimed at researchers, academics, and advanced students in biomedical engineering, image analysis, cognitive science, and computer science and engineering, this is an essential reference for those looking to advance their understanding in this applied and emergent field. Handbook of Texture Analysis, Two-Volume Set

Two-Volume Set

Edited by **Ayman El-Baz** University of Louisville, Kentucky, USA, **Mohammed Ghazal**, **Jasjit S. Suri** Global Biomedical Technologies, Inc., Roseville, USA

This two-volume handbook provides a comprehensive view of texture analysis in both AI-based industrial and medical imaging applications. Aimed at researchers, academics, and advanced students in biomedical engineering, image analysis, cognitive science, and computer science and engineering, this handbook is an essential reference for those looking to advance their understanding in this applied and emergent field.

Healthcare Services in the Metaverse

Game Theory, AI, IoT, and Blockchain

Edited by **Saurav Mallik** Harvard Univ., **Anjan Bandyopadhyay**, **Ruifeng Hu**, **Pawan Kumar Singh**, **Soumadip Ghosh**, **Sujata Swain**

Series: *Emerging Trends in Biomedical Technologies and Health Informatics*

This book covers the application of game theory, IoT and metaverse related to biomedical and healthcare applications. The book bridges the gap between radiologists and Artificial Intelligence (AI)-driven automated systems by investigating various techniques with a game theoretic approach. The book is written to help individuals across the academia, research, and healthcare practitioners as well as for those who work in biomedical, healthcare, IoT, artificial intelligence, metaverse, virtual reality, blockchain and related technologies.

Linear Partial Differential and Difference Equations and Simultaneous Systems with Constant or Homogeneous Coefficients

Luis Manuel Braga da Costa Campos University of Lisbon, Portugal, **Luís António Raio Vilela**

Series: *Mathematics and Physics for Science and Technology*

This presents six solution methods for linear partial differential equations (PDEs) with constant coefficients. The characteristic polynomial method is extended to five classes, including linear PDEs with homogeneous power coefficients, finite difference equations and simultaneous systems of both. Applications include solutions of the Laplace, heat, diffusion, telegraph, bar, and beam equations. The free and forced solutions are considered together with boundary, initial, asymptotic, starting, and other conditions. The book suits graduate students and engineers working with mathematical models and advanced technology and can be applied to the physical sciences and applied mathematics.

Multifunctional Magnetic Nanoparticles in Therapy, Biology, and Pharmacy

Synthesis, Fundamentals and Applications

Edited by **Elyor Berdimurodov**, **Chaudhery Mustansar Hussain**, **Burak Tuzun**

This definitive guide provides readers with a comprehensive overview of multifunctional nanoparticles, delving into their novel synthesis methods, unique properties, and diverse applications in therapy, biology, and pharmacy. The book explores established and emerging techniques for synthesizing magnetic nanoparticles, enabling readers to understand how to tailor nanoparticles with desired traits. This book is written primarily for scientists, researchers, and engineers working in the fields of nanotechnology, materials science, biomedical engineering, and pharmaceutical sciences.

Nanobiotechnology

Applications of Nanomaterials in Biotechnology, Medicine and Healthcare

Edited by **Tridib Kumar Bhowmick**, **Kaylan Gayen**, **Sunil K. Maity**

This book covers the topics related to drug delivery, biomaterials, drug design, formulation development, nanoscience, and nanotechnology. It describes the fundamental concepts in nanotechnology and their different applications in biotechnology to solve engineering challenges and generate new areas of technological development. This book will be useful for students, researchers, scientists, academicians, and industrial manufacturers to understand the importance and applicability of nanomaterials in the field of biotechnology and medical science.

Nanobiotechnology for Sustainable Food Management

Edited by **Eduardo Alberto López-Maldonado** Universidad Autónoma de Baja California, Mexico, **Amber R. Solangi** University of Sindh, Pakistan, **Fabio Granados-Chinchilla** San Pedro Montes de Oca, Costa Rica

Among the most novel and ever-growing approaches to improving the food industry is nanobiotechnology. In this book, the prospective role of nanobiotechnology in food which includes quality control and safety through nanosensors and biosensors, targeted delivery of nutrients, controlled release of nutrients, proteins, antioxidants, and flavors through encapsulation and enzymatic reactions for food fortification of fat-soluble compounds is discussed. Along the chapters of this book, nanobiotechnological techniques are addressed in detail with specific emphasis on food science applications. This book is aimed at researchers and graduate students in nanotechnology, and food engineering.

Nanomaterials and Point of Care Technologies

Edited by **Sushma Dave**, **Jayashankar Das**, **Mika Sillanpää**

Point-of-care (POC) diagnostic devices are predominantly used for the diagnosis and monitoring of diseases. To make these technologies scalable for manufacturing, user-friendly, inexpensive, sensitive, and rapid, combination of such devices with nanomaterials is required. This book deals with the new emerging fields such as POC tech, advanced nanotheranostics using nanomaterials, technologies, and applications in diagnosis. Current advances for the application of nanomaterials such as carbon nanotubes, graphene, and magnetic nanoparticles in POC devices and future directions are reviewed. The book aims at Researchers and professionals in nanotechnology & biomedical engineering.

Nanotherapeutics for Inflammatory Arthritis

Design, Diagnosis, and Treatment

Edited by **Vivek Mishra** Amity University, India, **Ramendra Pati Pandey** SRM University, India, **Anjali Priyadarshini** SRM University, India, **Chung-Ming Chang** Chang Gung University, Taiwan (R.O.C.), **Elcio Leal** Federal University of Para, Brazil

Series: *Advances in Bionanotechnology*

This book highlights nanobiotechnology and its therapeutic applications in the field of inflammatory arthritis, the interaction of nanomaterials in the biological systems, and clinical development of nanomedicines. It also covers the discovery of personalized therapeutics, diagnostics, and nanoparticulate delivery systems, the role of bioinformatics nanobiotechnology in personalized oncology. Use of nanosensors for the detection and current challenges in the development of personalized medicine is explained including recent nanotechnology-based strategies. This book is aimed at Researchers and Professionals in Nanotechnology, Biomaterial, Drug Delivery, and Inflammatory Arthritis.

Noninvasive Physiological Measurement

Wireless Microwave Sensing

James C. Lin University of Illinois at Chicago, USA

This book explains the principles and techniques of microwave physiological sensing and introduces fundamental results of noninvasive sensing of physiological signatures, signs, and life detection. Techniques for contact and remote sensing of circulatory and respiratory movements and physiological volume changes are discussed. This book is intended for researchers and professionals in biomedical, electrical, and computer engineering with an interest in antenna, sensors, microwave, signal processing, and medical applications. It will also be of interest to healthcare professionals, technologists, and practitioners interested in noninvasive physiological sensing and patient monitoring.

Novel Antibacterial Biomaterials for Medical Applications and Modeling of Drug Release Process

Vesna Mišković-Stanković, **Teodor Atanackovic**

This book provides a comprehensive review of synthesis and physicochemical and biological characterization of novel antibacterial biomaterials produced according to original procedures and aimed at medical applications such as wound dressing, soft and hard tissue implants, drug delivery devices and carriers for cell cultivation. This book is intended for all researchers working in the fields of biomaterials and biomedical engineering, as well as medical professionals, science and engineering graduate students, academics, and industrial researchers.

Recent Advances in Management and Engineering

Proceedings of Recent Advances in Management and Engineering

Edited by **Ilona Pawelozsek**, **Dorota Jelonek**, **Munish Sabharwal**, **Narendra Kumar**, **Karlibaeva Raya**

It is with great pleasure that I present to you the proceedings of our Recent Advances in Management and Engineering held on November 24 – 27, 2023 in Male, Maldives. This conference represents a milestone in our ongoing journey towards academic excellence where we aspire to become a renowned platform for the exchange of ideas, collaboration, networking, and learning.

Smart Micro- and Nanomaterials for Drug Delivery

Edited by **Ajit Behera** National Institute of Technology, Rourkela, **Arpan Kumar Nayak**, **Ranjan Kumar Mohapatra**, **Ali Ahmed Rabaan**

Series: *Emerging Materials and Technologies*

Smart drug delivery at both the micro- and nanoscale is an evolving field with numerous potential applications. It has the potential to revolutionize drug therapy by making treatments more effective, reducing side effects, and improving patient outcomes. This book presents a comprehensive review of the most recent studies on smart micro- and nanomaterials with a focus on their "smart" activity for formation of targeted and responsive drug-delivery carriers. This reference work is written to support researchers in the fields of materials engineering and biotechnology with the goal of improving the diagnosis and treatment of disease and patient quality of life.

Smart Micro- and Nanomaterials for Drug Delivery and Pharmaceutical Applications, Two-Volume Set

Edited by **Ajit Behera** National Institute of Technology, Rourkela, **Arpan Kumar Nayak**, **Ranjan Kumar Mohapatra**, **Ali Ahmed Rabaan**

Series: *Emerging Materials and Technologies*

Clinically approved micro- and nanobased products have impacted treatment of predominant diseases including cancer, diabetes, and different immune disorders. This Two-Volume Set presents a comprehensive overview of the most recent studies on smart micro- and nanomaterials for formation of targeted and responsive drug-delivery carriers and pharmaceutical applications. This wide-ranging reference work is written to support researchers in materials engineering and biotechnology with the goal of improving diagnosis and treatment of disease and improve patient quality of life.

Smart Micro- and Nanomaterials for Pharmaceutical Applications

Edited by **Ajit Behera** National Institute of Technology, Rourkela, **Arpan Kumar Nayak**, **Ranjan Kumar Mohapatra**, **Ali Ahmed Rabaan**

Series: *Emerging Materials and Technologies*

Smart drug delivery refers to a targeted drug delivery or precision drug delivery system that allows drugs to be administered to a specific location in the body or at a specific time with enhanced precision and control. This approach has several advantages, including maximizing the therapeutic effects of a drug while minimizing side effects. This book presents various stimuli-responsive micro- and nanomaterials for pharmaceutical industries. This reference work is written to support researchers in the fields of materials engineering and biotechnology with the goal of improving the diagnosis and treatment of disease and patient quality of life.

The Physics and Mathematics of Electroencephalogram

Dezhong Yao University of Electronic Science and Technology of China

This book focuses on a systematic introduction to the knowledge of mathematics and physics of EEG and discusses an in-depth application of EEG and the development of new methods and technologies for mining and analyzing EEG. This book can be used as reference for researchers in neuroengineering, cognitive neuroscience, neurology, psychiatry, applied mathematics, and those researching brain-like intelligence.

Syncope

From Etiopathogenesis to New Therapeutic Options

Edited by **Tolga Aksu**, **Carlos A. Morillo**

Syncope is a common condition related to transient loss of consciousness due to global cerebral hypoperfusion and caused by a variety of aetiologies. Although it is self-limited, and usually benign, syncope can be the harbinger of life-threatening heart rhythm problems due to cardiac conditions. This book provides a detailed review of etiopathogenesis and a state-of-the-art update on therapeutic options offering recommendations based on the guidelines and experience of experts while discussing procedures and tests with their indications, methodology, interpretation, and limitations.

2ND EDITION

Transcatheter Aortic Valve Implantation

Current and Future Developments

Edited by **Patrick W. Serruys**, **Alain Cribier** University Hospital Charles Nicolle, Rouen, **Helene Eltchaninoff** Centre Hospitalier Universitaire de Rouen, France, **Eberhard Grube** University Hospital Bonn, Germany, **Raj Makkar** Smidt Heart Institute, USA, **Yoshinobu Onuma** CORRIB Core Laboratory, Ireland, **John G. Webb** St. Paul's Hospital, Vancouver, BC, Canada, **Martin B. Leon** Columbia University Irving Medical Center, USA

Written by pioneers in the field of interventional cardiology, this new edition provides readers with the information and expert guidance needed to perform safe and effective transcatheter aortic valve implantation/replacement (TAVI/TAVR). The book is supplemented by visual aids, including more than 300 illustrations and videos.

The History and Compilation of Zhang Zhongjing's Wu Zang Lun

Five Viscera Theory

Qiang Cao, Yun Xiao

The History and Compilation of Zhang Zhongjing's Wu Zang Lun stands as the first comprehensive work in English detailing the history and compilation of Zhongjing's Treatise on the Five Zang Organs (*Wu Zang Lun*, 五藏論). It uses storytelling to illuminate the historical context of the five versions found in Dunhuang. By exploring the origin and development of these versions this book not only delves into traditional Chinese medicine but also intertwines fascinating elements of humanities, history, and geography. The reader is offered insight into the Dunhuang manuscripts' background and the significance of Zhongjing's contributions to medical literature.

Towards Holistic Medicine

Bing Yuan HK Modern Chinese Medicine R&D Center, Yau Ma Tei, Kowloon, Hong Kong, China

In recent years, the integrated research on living organisms initiated by systems biology, along with the efforts of precision medicine to tailor treatment plans based on the individual characteristics of each patient have opened up the process of modern biology and medicine returning to Chinese medical traditions in terms of ideas. Under the larger perspective of the development and evolution of Eastern and Western medicine, biology, and even natural science for hundreds of years, this book follows the evolution of modern scientific methods and reveals the inevitable trend of future medicine—holistic medicine.

Traditional and Herbal Medicines for COVID-19

Edited by **Jen-Tsung Chen**

Traditional and Herbal Medicines for COVID-19 explores promising ways to manage COVID-19, post-COVID, and long-COVID conditions. The management plans are based on anti-virus activity, anti-inflammatory, and diverse health benefits of traditional and herbal medicines through a comprehensive summarization of scientific literature by experts in the field. It presents information on a view of the origin of SARS-CoV-2, emerging variants and pathogenesis, and it proposes renewed strategies of diagnostics, vaccines, and therapies.

3RD EDITION

Atlas of Genodermatoses

Gianluca Tadini Istituto di Scienze Dermatologiche, Italy, **Michela Brena** Istituto di Scienze Dermatologiche, Italy, **Francesca Besagni**, **Lidia Pezzani**

This text presents a comprehensive illustrated overview of almost 200 inherited diseases of the skin, hair, and nails. Examples have been expanded, with new images added to provide clear examples, alongside coherent and comprehensive explanations to enable clinicians to easily identify and source relevant information. The entry for each disease provides background, followed by common characterisations, manifestations, laboratory findings, genetics, cutaneous and extracutaneous findings, differential diagnosis, an overview of complications and recommended follow-ups. In its third edition, this text becomes an invaluable resource for dermatologists and pediatricians.

Skin and Pregnancy

A Comprehensive Guide for Clinical Practice

Edited by **Rashmi Sarkar** Lady Hardinge Medical College, New Delhi, India, **Swati Agrawal** Lady Hardinge Medical College, New Delhi, India, **Soumya Jagadeesan** Amrita School of Medicine, Kochi, India

This text fills the gap between medical specialties in this topic, covering the dermatological diseases appearing during or affected by pregnancy; it also looks at safe drug usage and the cosmetic and aesthetic concerns of the pregnant woman. Most of the conditions discussed require a combined approach and treatment by the dermatologist and gynaecologist and obstetrician, and this text establishes a united therapeutic approach for all practitioners.

Cases in Haematology

for the MLA and PLAB

Aaron Niblock

Series: *MasterPass*

A solid grounding in and understanding of haematology is crucial for any doctor. The pathophysiology is fascinating, and the pharmacology is rapidly advancing, improving prognosis across many haematological conditions. Getting to grips with its fundamentals will stand any medical student in good stead during undergraduate studies and on into clinical practice. This book utilises single best answer-style questions in the popular MasterPass series of revision aids, covering the haematology presentations and conditions listed in the Medical Licensing Assessment content map.

Human Factors and Patient Safety

A primer for doctors and medical students

Ibrahim Imam Royal Devon and Exeter, UK

This book fulfils the need of doctors, medical students and all healthcare personnel for information that addresses fundamental patient safety concepts that are not usually covered in conventional medical curricula. The content encompasses the main areas of human factors and patient safety in short and easily accessible language supplemented by anecdotes from safety-critical industries such as aviation and nuclear power. Each chapter highlights the problems of human error and provides solutions that help to reduce the risks to patients. The coverage highlights the important role the public should play in protecting their own safety when in contact with healthcare systems.

Masterclass in Medicine

Lessons from the Experts

Edited by **Marcy B. Bolster**, Jason Liebowitz Skylands Medical Group, Rockaway, USA, **Philip Seo** Johns Hopkins University School of Medicine, Baltimore, USA

Nearly every medical school around the world teaches a class about the clinical foundations of medicine and how to start the process of becoming a skilled and caring physician. However, there has never been a book on it - until now. This premier text brings together talented and renowned physicians globally, to discuss important topics related to clinical excellence, including humility, empathy, and ingenuity in medicine. Healthcare professionals will gain tremendous knowledge by hearing the stories of what these master clinicians have learned from their patients and colleagues, thereby giving a foundation in how to achieve greatness as a clinician.

Nanotechnology Based Advanced Medical Textiles and Biotextiles for Healthcare

Edited by **Prashansa Sharma** Banaras Hindu University, UP, India, **Devsuni Singh** Banasthali Vidhyapith, Rajasthan, India, **Suman Pant** Banasthali Vidhyapith, Rajasthan, India, **Vivek Dave** CUSB, Bihar, India

This book provides a systematic coverage of research into medical and biotextiles based on nanomaterials as applicable in healthcare. Divided into three sections, it explains manufacturing, properties, types, and recent developments in nanotechnology based medical textiles backed by case studies. It includes wide range of different clinical applications of biotextiles for healthcare including nanotextile scaffolds, nano-based artificial organs, surgical sutures, enzymatic assisted enhanced biotextiles, tissue engineering or drug delivery system via nanofibers and so forth. This book aims at researchers and graduate students in textile technology and engineering, and medical textiles.

Pass the MRCP (SCE) Neurology Revision Guide

Dhananjay Gupta

Series: *Master Pass Series*

This up-to-date revision guide for the MRCP (Specialty Certificate Examination) in Neurology covers the core areas that are essential to exam success. The chapters reflect the exam syllabus and help exam candidates remember and recall core concepts. The chapter format and style provide a structured and focused approach to studying essential neurology topics, ensuring a comprehensive understanding of the subject matter. Whether you are a resident or trainee preparing for your first SCE examination or a seasoned neurologist seeking to enhance your knowledge and skills, this book will provide you with the necessary tools for success.

3RD EDITION

Practical Ultrasound

An Illustrated Guide

Jane Alty, **Edward Hoey**, **Michael Weston**

In the hands of a skilled operator, ultrasound scanning is a simple and easy procedure. However, reaching that level of proficiency can be a long and tedious process. Commended by the British Medical Association, Practical Ultrasound, Third Edition incorporates up-to-date techniques and protocols, focusing on the scans regularly encountered in a busy ultrasound department. This book provides everything novice practitioners need to know to become competent and skilled in scanning. The authors' precise approach puts an immense amount of knowledge within easy reach, making it an ideal aid for learning the practicalities of ultrasound.

Radiology of the Abdomen and Pelvis

A Case-Based Guide

Swati Goyal Gandhi Medical College, Bhopal, India

A succinct account of various routinely experienced pathologies and suitable images has been enlisted as 162 case studies. The cases are structured into thematic chapters with an integrated approach to basic learning. Each case study follows a similar format with a brief clinical presentation, relevant imaging findings, discussion with differential diagnosis, management, and suggested readings. The book focuses on the pointwise description of cases routinely encountered in abdominopelvic imaging that help students, trainees and radiologists to write certificate examinations.

Recent Advancements in the Diagnosis of Human Disease

Edited by **Irshad M. Sulaiman** U.S. Food and Drug Administration, USA

Viruses, bacteria, fungi and parasites are known to cause the most common human disease. It frequently spreads through direct contact (from human to human, animal to human), and through contaminated food or water. With the advancement of diagnostic techniques, it is now possible to rapidly identify microorganisms causing human disease and correlate with the corresponding clinical infection. Therefore, there is a need to develop robust and high-throughput diagnostic methods to prevent and control human disease of public health importance.

Severe Pulmonary Emphysema:

A Comprehensive Guide to Precision Interventional Procedures

Edited by **Luis Carlos Losso**, **Gerard J. Criner**, **Pallav L. Shah** MD, MBBS, FRCP, Consultant Physician, Royal Brompton Hospital and Chelsea and Westminster Hospital, London, UK, **Walter Weder**, **José R Jardim**

Pulmonary emphysema is one of its most serious phenotypes, with chronic and inexorable progression and, in the most severe stages, it is highly disabling and lethal. This book reviews knowledge about the pathophysiology of severe pulmonary emphysema and current innovative interventional and minimally invasive therapeutic concepts for the management of these advanced stages of emphysema, based on the best scientific evidence. This book is a valuable resource for clinicians dealing with critically ill patients with COPD

The Impact of Artificial Intelligence in Radiology

Edited by **Adam E. M. Eltorai**, **H. Henry Guo**

Series: *AI in Clinical Practice*

Implementation of artificial intelligence (AI) in Radiology is an important topic of discussion. Advances in AI—which encompass machine learning, artificial neural networks, and deep learning—are increasingly being applied to diagnostic imaging. While some posit radiologists are irreplaceable, certain AI proponents have proposed to “stop training radiologists now.” By compiling perspectives from experts from various backgrounds, this book explores the current state of AI efforts in Radiology along with the clinical, financial, technological, and societal perspectives on the role and expected impact of AI in Radiology.

Thinking About Medicine

An Introduction to the Philosophy of Healthcare

David Misselbrook

This introduction to the philosophy of medicine surveys the landscape of western philosophy as it pertains to healthcare in an accessible way. Written by a doctor for doctors and other health professionals, framing the 'toolbox' of philosophy within the community of medicine, it encourages examination of the implicit assumptions made in the construction of medical knowledge and practice. The book is an ideal textbook for students of medicine and medical philosophy and will also be of interest to bioethicists, medical sociologists to improve their understanding of philosophy and ethics and sharpen their critical thinking skills.

Thinking About Thinking

A Prescription for Healthcare Improvement

Yang Chen, **Myura Nagendran**

This book is about the practice of medicine and the decision-making of the people we entrust with our care. Through personal experience, research and feedback from colleagues across healthcare, the authors examine how metacognition – or thinking about thinking – can provide a toolkit with which to improve the decision-making of all healthcare professionals. The rise of digital tools and AI-based clinical support systems makes this a critical time to grasp how human decision-makers operate and how to best harness the increasing volume of healthcare data available.

3RD EDITION

100 Cases in Obstetrics and Gynaecology

Cecilia Bottomley Consultant in Obstetrics and Gynaecology, Chelsea and Westminster NHS Trust, London, UK, **Ruth MacSwan**, **Janice Rymer**

Series: 100 Cases

100 Cases in Obstetrics and Gynaecology presents 100 obstetric- or gynaecology-related scenarios commonly seen by medical students and junior doctors in the emergency department, outpatient clinic, or on the ward. A succinct summary of the patient's history, examination, and initial investigations—including photographs where relevant—is followed by questions on the diagnosis and management of each case. The answer includes a detailed discussion on each topic, with further illustration where appropriate, providing an essential revision aid as well as a practical guide for students and junior doctors.

2ND EDITION

Embryology Explained

A Comprehensive Textbook for Medical Students & Junior Doctors

Fawz Kazzazi, **Diana Kazzazi**, **Danny Kazzazi**

An essential guide to embryology for medical students and junior doctors, enriched with original illustrations help readers to that navigate the complexities of embryonic development. This refreshingly simple text highlights the practical clinical applications of embryology, making it more pertinent and accessible to a wide medical audience. Each chapter is organized into four main sections—embryology, clinical relevance, molecular details, and key points—allowing learners to efficiently review and connect the material with their specific academic and exam requirements. It is an easy-to-read and comprehensive textbook that will explain embryology for you!

3RD EDITION

Ultrasound of Congenital Fetal Anomalies

Differential Diagnosis and Prognostic Indicators

Dario Paladini Gaslini Children's Hospital, Genoa, Italy, **Paolo Volpe**

An acclaimed overview of ultrasound for the prenatal diagnosis of congenital anomalies returns in a new enlarged edition. In particular, the coverage of both Central Nervous System congenital and acquired anomalies as well as Congenital Heart Disease has been expanded enormously, to make this an impressive comprehensive resource for Fetal Neurology and Fetal Cardiology. Together with additional new chapters on guidelines and protocols, equipment, and disorders of sexual differentiation, and new insight into fetal surgery procedures, this third edition almost becomes three books in one.

Introduction to Vision Training

Nadia Jankielsohn

This book addresses the limited information about vision training and the importance of having knowledge of superior visual skills in our everyday, individualised environment like the classroom, workspace, and sports setting. It explains the tests that an eye care professional can do to determine the level of a patient/athlete's visual skills to regulate where improvement needs to be done. Written in a concise manner and supplemented with insightful visual materials, the book will allow the reader to formulate an individualised program according to the needs of the patient/athlete.

Keratoconus

Optical and Surgical Management

Edited by **Mehrdad Mohammadpour , Masoud Khorrami- Nejad**

This is an updated and comprehensive treatise on optical, medical and surgical management of keratoconus with an exclusive panoramic view of all existing modalities for confronting serious disabling morbidity affecting people in their youth. Early diagnosis and proper treatment can salvage vision and help patients to get back to their routines and enhance their quality of life. The contents include optical and glass prescription, and contact lens fitting, cxi alone and combined surgeries, phakic IOLs, and corneal transplantation. The illustrated and organized 360 degrees approach makes this a must-have manual for ophthalmology trainees, fellows, and professionals.

3RD EDITION

Browning's Audiology for Clinicians

George Browning, Emma Stapleton, Haytham Kubba

This book is a practical guide to interpreting audiometric tests, alongside the clinical assessment, to make sound evidence-based decisions in the clinical management of adults and children with ear conditions. This third edition of a popular and classic text is an essential revision aid for ENT trainees preparing for specialist examinations including the FRCS (ORL-HNS). Fully updated and well-illustrated, it provides up-to-date content on the management of a wide range of ear conditions and will be of interest to the whole multi-disciplinary team including audiologists, audiological scientists, audiological physicians, private hearing aid providers and speech and language therapists.

2ND EDITION

Dizziness and Vertigo

An Introduction and Practical Guide

Edited by **Rahul G. Kanegaonkar** Medway Maritime Hospital, Kent, UK, **James R. Tysome** Cambridge University Hospitals, UK

Dizziness and Vertigo provides practitioners with a comprehensive overview of dizziness and vertigo, steps for diagnosing patients, and various treatment options. This new edition provides a framework for the accurate diagnosis and management of patients with dizziness and vertigo, covering clinical assessments and case studies. It includes new methods for treating Meniere's Disease, Benign Paroxysmal Positional Vertigo (BPPV) and in the field of Vestibular Rehabilitation. Dizziness and Vertigo is an essential reference for all those who manage patients in the outpatient setting, including general practice trainees, ENT specialists and physiotherapists.

12TH EDITION

Logan Turner's Diseases of the Nose, Throat and Ear

Head and Neck Surgery, 12th Edition

Edited by **S Musheer Hussain**, **Quentin Gardiner**

This classic ENT textbook has been updated and expanded to reflect the increasing sophistication of diagnostic and management skills. New material includes a chapter on Middle Ear Devices and information on recent technical advances, including brand new implant devices. Each chapter includes key learning points, up-to-date references, and suggestions for further reading. Many chapters benefit from updated figures which provide clarity and enhance the effectiveness of the text. ENT trainees and other practitioners with an interest in otolaryngology will find this all-purpose textbook ideal for a thorough understanding of the specialty.

Talking Points on Deprescribing in Hospice Care

Deepak Shrivastava UC Davis School of Medicine, Sacramento, California, USA

Deprescribing practice in hospice medicine has expanded exponentially in recent years. This book systematically addresses the groups of extremely useful medications to manage chronic disease conditions and prevent complications. It highlights the positive intervention of reducing polypharmacy, improving a terminally ill patient's quality of life, providing individual patient context and helping clinicians in deprescribing. It discusses good ethics, patient wishes and side effect protocols to discontinue no longer relevant medications, thus improving decision-making with the goal of enhancing the patient's quality of life during the time when it is needed the most.

Fetal and Perinatal Skeletal Dysplasias

An Atlas of Multimodality Imaging

Christine M Hall , Amaka C Offiah , Francesca Forzano , Mario Lituania , Gen Nishimura , Valerie Cormier-Daire

This atlas is intended to give all relevant clinicians a thorough insight into conditions (and variants) of skeletal dysplasias. Clinical and imaging findings are properly illustrated, enriched by updated genetic information. This acclaimed text returns in a revised form, with updated material particularly on the new knowledge surrounding the genetic basis and mechanism for the various skeletal dysplasias. No clinician dealing with fetal or neonatal skeletal diagnosis or treatment will want to be without access to the wealth of illustrations and detail condensed here.

Just a GP

Diaries from a Career in General Practice

Denis Pereira Gray

This autobiography from Sir Denis Pereira Gray offers a unique insight into the life and career of a hugely distinguished and influential general practitioner, from what led him to study medicine, learning his craft in the 1960s, through years of clinical practice and research to senior leadership roles within and outside the Royal College of General Practitioners. Both informative and inspirational, *Just a GP* is an essential read for many who have journeyed through the profession with Sir Denis and those who are in the midst of or contemplating a career in general practice today.

Leading Primary Care

Tales from the Leadership Hikers

Edited by **Amar Rughani** Former General Practitioner and Associate Postgraduate Dean, Yorkshire and the Humber, UK, **Joanna Bircher** General Practitioner, Clinical Director Greater Manchester GP Excellence Programme, Manchester, UK

This new book of leadership narratives fleshes out the reality of working to achieve change in primary care and will be relevant to a wide primary care audience, empowering both clinicians and non-clinicians to recognize and use their leadership qualities. The book draws together stories from a wide range of primary care practitioners who work at different levels from junior to senior, and both in practice and at scale, to show how they used their leadership in primary care, the difficulties they faced and the lessons they learned.

Learning from Clinical Cases in Primary Care

For MRCGP and Beyond

Samar Razaq

This new book is designed around twenty clinical cases, each representative of scenarios encountered by doctors who work in primary care and which will prompt learning in related issues surrounding each clinical scenario. Each case description concludes with an initial exam style question which MRCGP candidates will recognise as being directed towards learning for the Applied Knowledge Test (AKT). An expanded answer to that initial question is followed by a detailed explanation, concluding with further questions for self-assessment and reflection.

The Role of Vitamins in Combating Infectious Viral Diseases

Edited by **Aditya Arya** National Institute of Malaria Institute (NIMR), ICMR Lab Dwarka, Delhi, India, **Rakesh Kaushik**

This book highlights the role of vitamins in preventing or reducing the pathogenesis or treatment of infectious viral diseases based on current ongoing research and past work. Using clinical evidence and trials that suggest the potential benefits of vitamin supplementation as prophylactic and therapeutic in infectious viral diseases, each individual vitamin is described in this context in separate chapters. It will be a valuable reference aid to researchers, clinicians, and medical bodies to develop improved therapeutic regimens.

What do I say next? Everyday Mental Health Conversations in Primary Care

A Practical Guide

Sophie Jadwiga Ball, Liz Moulton

A significant problem experienced by some GPs and many trainees is the challenge of completing a useful and safe consultation with patients with mental health problems within the constraints of a standard-length appointment. These challenges may arise from a lack of specific expertise in this area, poor training in the relevant skills and, perhaps, the attitude that there is not much that the primary care practitioner can do to help. This new book focuses on enhancing the repertoire of communication skills available for mental health consultation. Essential reading for all primary care practitioners in training and in practice.

Intelligent Drug Prescribing in Psychiatry

Supporting the Patient-Prescriber Partnership

Peter Tyrer

This new book describes how to bring patient and prescriber together in an active partnership for better understanding of the positive and negative elements of drug prescription, drawing on the author's distinguished career in front-line psychiatric practice. At present there is a gap between doctor and patient expectations, but balanced decision-making with joint involvement is needed to separate the drugs that are needed regularly to maintain health, those that are only needed when required, and those that are mere fashion accessories. The consequence of a better partnership will be less over-prescribing, a reduction of polypharmacy, and a lessened need for deprescribing.

50 Landmark Papers every Colorectal Surgeon Should Know

Edited by **John R.T. Monson**, **Lawrence Lee**, **Fergal J. Fleming**

Series: *50 Landmark Papers*

This book identifies the 50 key scientific articles in the field of Colorectal Surgery and through expert reflections and editorial perspectives explains why these papers are important. Influential contributors who have shaped the practice of modern Colorectal Surgery comment on the Landmark Papers that have defined the specialty. This an invaluable reference for trainees, fellows, and surgeons studying for exams, as well as for seasoned surgeons who want to stay current in their field.

A Test of Morals

Surgical, Ethical, and Psychosocial Considerations in Human Head Transplantation

L. Allen Furr Auburn University, USA

While transplanting human heads is not a new concept, the idea has largely been relegated to religious lore or as a plot device in science fiction. But now, a surgical plan to perform the complex procedure exists, and though most physicians question head transplantation's medical veracity, bioethicists have challenged the surgery on moral grounds. *A Test of Morals* compiles and examines the ethical questions that dog those who advocate for conducting this most radical of medical proposals in order to determine if society should move forward and allow head transplantation to occur.

Bailey & Love's Essential Operations in Hepatobiliary and Pancreatic Surgery

Edited by **Ashley Dennison** Leicester General Hospital, Leicestershire, **Guy Maddern** University of Adelaide, The Queen Elizabeth Hospital, Adelaide, Australia, **Jia Fan** Zhongshan Hospital, Fudan University, China

Series: *Bailey & Love's Essential Operations*

Bailey & Love's Essential Operations in Hepatobiliary and Pancreatic Surgery provides step by step explanations of both the core operations and more complex procedures. Written by acknowledged experts and trainers from around the world, and with abundant diagrams and figures to explain the operative steps, this new resource will enable hepatobiliary and pancreatic surgeons to increase their skills in this demanding and technically challenging field. Over 70 easy to read chapters provide surgeons with the information they need, and in the process help to increase their clinical judgement, their experience, and their technical skills.

Cloacal Malformations: Case Studies

Edited by **Marc Levitt** Chief of Colorectal and Pelvic Reconstruction Surgery, Children's National Medical Center, Washington DC, USA

Series: *Pediatric Colorectal Surgery*

A comprehensive account of all elements of care for the cloaca patient, from pre-operative evaluation to the long-term management of patients with cloacal malformations. Case studies provide valuable insights into a range of clinical scenarios, never previously categorized in this way. Fully illustrated, in color, and with further resources available online, this is a unique resource for all clinicians within the pediatric team caring for patients with cloacal malformations. Specialists across numerous fields will find this practical clinical text to be an invaluable resource when dealing with the complex needs of the cloaca patient.

Contemporary Management of Acute and Chronic Venous Disease

Edited by **Juan Carlos Jimenez**, **Samuel Eric Wilson**

With a focus on evidence based, contemporary and clinically relevant information, this practical new resource provides a concise, clinical, and techniques-focused guide to the medical, endovenous, and surgical management of patients with acute and chronic venous disease. In this guide, internationally recognised chapter authors cover the general principles of the pathophysiology, diagnosis, indications and decision making around the management of acute and chronic venous disease. Vascular surgeons and trainees will find this an invaluable resource, providing insights into key techniques and approaches to the treatment of acute and chronic venous disorders.

Cracking the MRCS Part A

A Revision Guide

Olivia A M Smith Hull York Medical School, UK

A unique revision guide aimed at candidates preparing for the MRCS examinations. The Part A exam is designed to test knowledge of both basic science and the principles of surgery in general. There is a focus on the most common questions asked pertaining to anatomy (representing 42% of the MRCS Part A paper 1). The content has been designed specifically to help junior doctors memorise essential surgical facts. This will be particularly useful in the pressured run up to the MRCS examination, and it provides a convenient aide-memoire that will save hours of note taking.

Esophageal Cancer Surgery

Akiyama Procedure

Henri Kolani

A specialist clinical monograph for thoracic and general surgeons who specialise in the treatment of esophageal cancer. Esophageal cancer is a challenging area requiring the treatment by the multidisciplinary team. In this type of surgery, tumors located in the middle and upper 1/3 are challenging, and the author describes how the use of the Akiyama procedure has maximised operative access. The content is suitable for practising surgeons with a range of surgical experience, and the step by step approach is fully illustrated with both photographs and access to operative videos. Key points are described, and potential pitfalls explained.

Essential Paediatric Surgery

A Practical Guide

Edited by **Paul D Losty** Alder Hey Children's NHS, UK,
Martin T Corbally

A timely practical textbook encompassing the full range of clinical conditions within paediatric surgery. Surgeons-in-training will be delighted to discover that world author experts have generously contributed to this textbook to offer a concise outline of paediatric surgical practice, ensuring that they are wholly familiar with a wide range of clinical scenarios. Key topics are included within sections on neonatal surgical conditions, surgical disorders of infancy, surgical conditions in childhood and adolescence, head and neck, hepatobiliary and pancreatic disorders, preparation of the child for surgery, malignant disorders, urology, neurosurgery, and trauma.

5TH EDITION

Handbook of Venous and Lymphatic Disorders

Guidelines of the American Venous Forum

Edited by **Peter Gloviczki** Mayo Clinic, Rochester, MN, USA. Editor-in-Chief, Journal of Vascular Surgery.

Written by the world's foremost venous experts, leaders of the American Venous Forum, and international authorities, the Handbook has become the most important reference for both day-to-day management and investigation of venous and lymphatic disorders. The 5th edition covers the full spectrum of acute and chronic venous disorders, chronic lymphedema and chylous complications. New or entirely revised chapters discuss in detail basic considerations, diagnostic evaluation, management of acute venous thrombosis and chronic venous disorders, including deep venous disease and venous ulcers.

6TH EDITION

Manual of Definitive Surgical Trauma Care

Incorporating Definitive Anaesthetic Trauma Care

Edited by **Kenneth D Boffard** BSc(Hons) FRCS FRCPS FCS(SA), Emeritus Prof, Dept of Surgery, Milpark Hospital and University of the Witwatersrand, SA, **Jonathan White** Copenhagen University Hospital, Copenhagen, Denmark

Developed for the International Association for Trauma Surgery and Intensive Care (IATSIIC), the Manual of Definitive Surgical Trauma Care 6e is ideal for training all surgeons who encounter major surgical trauma on an infrequent basis. Reflecting the experience of authors whose knowledge and practical expertise is unrivalled, it focuses on integrated simultaneous care with clinicians working as a team around the patient. It includes website access to a selection of videos which provide an anatomic overview of surgical approaches.

Mind Maps in Surgery and Surgical Anatomy for Medical Students

Olivia A M Smith Hull York Medical School, UK

This new learning and revision aid from the author of the bestselling Mind Maps for Medical Students has been designed specifically to help medical students memorize essential facts in surgical pathology and anatomy, invaluable throughout undergraduate studies and particularly useful in the pressured run-up to final exams. Over 100 maps are organized by surgical specialty and anatomical region as appropriate and reflect the latest surgical information and published guidelines.

Pediatric Abdominal Organ Transplantation

An Introduction and Practical guide

Sergio Assia-Zamora King's College Hospital, U.K., **Nigel Heaton** King's College Hospital, U.K.

Pediatric abdominal organ transplantation is a complex procedure that requires a multidisciplinary team. This book highlights the surgical point of view of these transplantations, including the kidney, liver, pancreas, and small bowel. It is intended to deepen the knowledge of these type of transplants for medical students, nurses, doctors, anaesthetists. This book will serve to expand the understanding the general concepts of pediatric abdominal transplantation, indications, surgical procedure, and complications of each type of graft for all multidisciplinary team members.

Vascular Surgery:

Illustrated Clinical Cases

James Forsyth

Series: Illustrated Clinical Cases

Focusing on Vascular Surgery, this text provides clinical case scenarios with some challenging questions, followed by reasoned answers. The cases are presented randomly, as in real life, and are supported by photographs of the highest quality. Making speedy and appropriate clinical decisions and choosing the best course of action to take as a result, is one of the most important and challenging parts of postgraduate surgical training. These true to life cases will teach trainee vascular surgeons to develop clinical management plans, and to develop their diagnostic and management skills.

A Professional's Guide to Feline Behaviour

Understanding, Improving and Resolving Problems

Caroline Clark Clinical Animal Behaviorist

A Professional's Guide to Feline Behaviour is an invaluable resource for veterinarians, shelter workers, behaviourist and others working cats, while being accessible to anyone who shares their life with a cat and wants to gain a deeper understanding of their behaviour. It offers a greater understanding of cats and how to meet their needs, explains how to deal with challenges that cats face and how to analyse feline behaviour accurately, with a view to designing a tailored behaviour modification plan. Real-life case studies, accompanied with behaviour plans that integrate clinically proven methods, help manage or resolve a range of behaviour issues.

Omics Approaches in Veterinary Parasitology

Diagnosis, Biomarkers, and Drug Development

Edited by **Muhammad Sohail Sajid**, **Hafiz Muhammad Rizwan**

This book explores applications of omics approaches for diagnosis, biomarker discovery, and drug development against parasites of veterinary importance. It presents the fundamental principles of parasite biology and their complex physiological processes. The chapters review key aspects such as parasite life cycles, host-parasite interactions, and the molecular mechanisms that underlie parasitic diseases.

3RD EDITION

Small Animal Anesthesia and Pain Management

A Color Handbook

Edited by **Jeff C. Ko** College of Veterinary Medicine, Purdue University, USA

Series: Veterinary Color Handbook Series

Small Animal Anesthesia and Pain Management is a thoroughly updated and much expanded third edition that provides comprehensive coverage of the world of veterinary anesthesia and pain management. This clinically focused text draws upon practical experience and clinical evidence from various sources. It provides drug dosages and anesthetic protocols in tabular form, complemented by over 400 illustrations that enhance comprehension and visual clarity. These chapters shine a spotlight on a newly approved drug, showcasing the practical application of Zenalpa® (medetomidine and vatinoxan) for a range of sedative and anesthetic combinations in dogs and cats.

2ND EDITION

The Equine Distal Limb

An Atlas of Clinical Anatomy and Comparative Imaging

Jean-Marie Denoix

This new edition replaces existing ultrasound images and most of the radiographic and MRI images with new, updated versions and adds new images of extraordinarily high quality, the multiple views of each area of the distal limb providing an extremely detailed evaluation. The diagnosis and management of distal limb lameness require a precise knowledge of the functional anatomy and biomechanics of the equine distal joints, ligaments and tendons which are presented in the last chapter. The book is designed for maximum clarity using a generous page size. The atlas is essential for anybody involved in detailed anatomical study, complex lameness evaluation or advanced imaging techniques.
