Conventional Military Strategy in the Third Nuclear Age

Joy Mitra

Series: *International Politics in the Age of Disruption*

This volume delves into the way conventional deterrence operates between nuclear-armed states in the third nuclear age. Unlike the first and second ages the advent of this new age has witnessed greater strain on the principles of mutual vulnerability and survivability that may result in increased risks of advertent or inadvertent escalation and horizontal nuclear proliferation. It looks at the sum of three key simultaneous developments in the third nuclear age that merit attention. These include the emergence of asymmetric strategies, introduction of unmanned platforms and the expansion of nuclear arsenals.

The Psychology of Terrorism

Neil Shortland

Series: *The Psychology of Everything*

What is terrorism? Can anyone be radicalized? How can we respond to terrorist acts? The Psychology of Terrorism seeks to explain why some acts of violence are considered terrorism, and others are not, and why some individuals may be more susceptible to engaging in terrorist behavior. Debunking myths and lazy stereotypes, the book delves into some of the most shocking atrocities of our times to discuss the complex psychological characteristics of individual terrorists, organised groups, and their acts. Whilst there is no simple solution, The Psychology of Terrorism shows us that a growing reverse radicalization movement and modern interventionist techniques can give us hope for the future.

The authors address the most prevalent myths and preconceptions and demonstrate how these prevent a true understanding of the enormously diverse peoples and cultures of Africa. Understanding the China Threat

Edited by **Lianchao Han**, **Bradley A. Thayer** University of Minnesota-Duluth, USA

This book examines the contours of the US-China confrontation and its future trajectories. It delineates the two major causes of the friction in Sino-American relations — change in the balance of power in China's favor and the conflicting ideologies of the two states — and emphasizes why it is imperative for the US to hold on to its ideological principles. It demonstrates the ultimate and irreconcilable gap in the visions the two competitors have for international politics, and consequently why conflict — certainly cold, and very possibly hot — is inevitable.

New approaches

Chris Alden London School of Economics & Political Science, London, UK, **Amnon Aran**, **Ana Cristina Alves**

Building on the success of the first edition, this revised volume re-invigorates the conversation between foreign policy analysis and IR. John Callaghan, **Brendon O'Connor**, **Mark Phythian**
University of Leicester, UK

Series: Routledge Studies in US Foreign Policy

A comprehensive account of ideology and its role in the foreign policy of the USA, this book investigates the way US foreign policy has been understood, debated and explained in the period since the US emerged as a world power, on its way to becoming the world power. Human Rights and U.S. Foreign Policy

Prevarications and Evasions

Clair Apodaca Virginia Tech University, USA

Series: *Routledge Studies in Human Rights*

Through a series of chapters devoted to U.S. presidential administrations from Nixon to the present, Apodaca delivers a comprehensive examination to understand the development and implementation of U.S. human rights policy. For each administration, she pays close attention to how ideology, bureaucratic politics, lobbying, and competition affect the inclusion or exclusion of human rights in the economic and military aid allocation decisions of the U.S. In doing so, she argues that the history of U.S. human rights policy unfolds as a series of paradoxes that are the result of Presidential preferences, conflict, and cooperation among bureaucratic actors, and of various political events.

International Law

Our Common Future

Mark Gibney

International Law: Our Common Future offers a dynamic approach to the study of international law that actively engages students in ways that more traditional textbooks do not. What students will quickly come to realize is that international law is not a distant and abstract entity, but rather, is intimately connected to various aspects of their daily lives. The book shows some of the remarkable changes in international law, most notably the declining importance of the role of the state. As a final point, the book is written in an engaging, almost conversational, style that is accessible to students in a wide array of academic disciplines.

Facts and Explanations in International Studies...and beyond

Patrick Thaddeus Jackson American University, Washington DC, USA

The politicizing of facts and factual claims has led some to abandon all talk of a meaningful distinction between a fact and a strongly held political commitment. This book argues that what we need, instead, are better accounts of facts and their relationship to explanation—ones that take seriously the dependence of facts on communities of practice and on consensus procedures of measurement, but do not abandon the epistemic distinctiveness of facts.

Edited by **Smita A. Rahman** DePauw University, USA, **Katherine A. Gordy** San Francisco State University, USA, **Shirin S. Deylami** Western Washington University, USA

With the help of this textbook, students of political theory no longer need to learn about ideas in a vacuum with little or no attention paid to how such ideas are responses to varying local political problems in different places, times, and contexts. Committed to a multiplicity of perspectives and an active engagement between the global and the local, Globalizing Political Theory connects directly with undergraduate and graduate-level courses in political theory, global political theory, and non-western political thought.

Muslim Democracy

Politics, Religion and Society in Indonesia, Turkey and the Islamic World

Edward Schneier City College of the City University of New York

Muslim Democracy explores the relationship between politics and religion in forty-seven Muslim-majority countries, focusing especially on those with democratic experience, such as Indonesia and Turkey, and drawing comparisons with their regional, non-Islamic counterparts. Unlike most studies of political Islam, this is a politically-focused book, more concerned with governing realities than ideology. By changing the terms of the debate from theology to politics, and including the full complement of Islamic countries, Schneier shows that the boundaries between church and state in the Islamic world are more variable and diverse than is commonly assumed.

Islam in Russia

Formations of Tolerance

Diana Galeeva University of Oxford, UK

Islam in Russia is a rare scholarly attempt to understand the tolerant nature of Islam in the modern Russian Federation since the state's official acceptance of Islam. The book explores the key factors that have contributed, over time, to the establishment of a co-existent form of Islam in modern multi-ethnic and multinational Russia. It concludes that the co-existent form of Islam in Russia can be linked to three key factors: its historical emergence, the intellectual culture, and strong regional identities. This book is a useful resource for students and scholars of Global Islam, Islam in Europe, History of Russia, Islamic History, Islamic Thought and Modern Religious History.
